Energy Fuels' Mark Chalmers on creating a new U.S.-to-Europe rare earths supply chain

In a recent InvestorIntel interview, Tracy Weslosky speaks with Mark Chalmers, President and CEO of Energy Fuels Inc. (NYSE American: UUUU | TSX: EFR) about how the recent contract signed with Neo Performance Materials Inc. (TSX: NEO) has created a new U.S.-to-Europe rare earths supply chain.

In this InvestorIntel interview, which may also be viewed on YouTube (click here to subscribe to the InvestorIntel Channel), Mark went on to say that Energy Fuels is focused on extracting rare earths from monazite sand and explained why it is "more compelling and competitive than any other source of rare earths feed in the world." He added that utilizing its existing infrastructure, Energy Fuels is producing rare earth carbonate with plans to develop its own separation capabilities at its White Mesa Mill in Utah to become a producer of rare earth products based in the United States.

About Energy Fuels Inc.

Energy Fuels is a leading U.S.-based uranium mining company, supplying U_3O_8 to major nuclear utilities. Energy Fuels also produces vanadium from certain of its projects, as market conditions warrant, and is ramping up to commercial production of REE carbonate in 2021. Its corporate offices are in Lakewood, Colorado, near Denver, and all of its assets and employees are in the United States. Energy Fuels holds three of America's key uranium production centers: the White Mesa Mill in Utah, the Nichols Ranch in-situ recovery ("ISR")

Project in Wyoming, and the Alta Mesa ISR Project in Texas. The White Mesa Mill is the only conventional uranium mill operating in the U.S. today, has a licensed capacity of over 8 million pounds of U_3O_8 per year, has the ability to produce vanadium when market conditions warrant, as well as REE carbonate from various uranium-bearing ores. The Nichols Ranch ISR Project is on standby and has a licensed capacity of 2 million pounds of U_3O_8 per year. The Alta Mesa ISR Project is also on standby and has a licensed capacity of 1.5 million pounds of U_3O_8per year. In addition to the above production facilities, Energy Fuels also has one of the largest NI 43-101 compliant uranium resource portfolios in the U.S. and several uranium and uranium/vanadium mining projects on standby and in various stages of permitting and development.

Neo Performance Materials' Constantine Karayannopoulos on creating a new U.S.-to-Europe rare earths supply chain

In a recent InvestorIntel interview, Tracy Weslosky speaks with Constantine Karayannopoulos, President, CEO and Director of Neo Performance Materials Inc. (TSX: NEO) about how the recent contract signed with Energy Fuels Inc. (NYSE American: UUUU | TSX: EFR) has created a new U.S.-to-Europe rare earths supply chain.

In this InvestorIntel interview, which may also be viewed on YouTube (click here to subscribe to the InvestorIntel Channel), Constantine went on to say that the supply chain

supplements Neo's existing rare earth feed supply and will help it to ramp up rare earth production at its plant in Estonia to meet demand from their growing customer base in Europe. Talking about the ESG implication of the deal, he explained that it unlocks "extraordinary economic and environmental potential by utilizing low-cost rare earth feedstock from monazite ore that is a byproduct of existing mining."

Nickel 28’s Anthony Milewski on the role of nickel and

environmental commodities in the EV revolution

In a recent InvestorIntel interview, Tracy Weslosky speaks with Anthony Milewski, Chairman of Nickel 28 Capital Corp. (TSXV: NKL) about “the revolution underway here to electrify not only cars but the grid and a lot of aspects where a key component of those batteries is nickel.”

In this InvestorIntel interview, which may also be viewed on YouTube (click here to subscribe to the InvestorIntel Channel), Anthony went on to discuss Nickel 28’s investment in the Ramu Project and the strong fundamentals for nickel. Discussing nickel’s role in electric vehicles, energy storage he explores the overall market fundamentals for nickel in any portfolio. Speaking on the competitive advantages of Nickel 28, Anthony said that in addition to being a nickel producer, Nickel 28 has a strong royalty portfolio in several nickel-cobalt projects that are located in safe mining jurisdictions in the world.

To watch the full interview, click here

About Nickel 28 Capital Corp.

Nickel 28 Capital Corp. is a nickel-cobalt producer through its 8.56% joint-venture interest in the producing, long-life and world-class Ramu Nickel-Cobalt Operation located in Papua New Guinea. Ramu provides Nickel 28 with significant attributable nickel and cobalt production thereby offering our shareholders direct exposure to two metals which are critical to the adoption of electric vehicles. In addition, Nickel 28 manages a portfolio of 13 nickel and cobalt royalties on development and exploration projects in Canada, Australia and Papua New Guinea.

Energy Fuels' Mark Chalmers and Constantine Karayannopoulos of Neo Performance Materials on the creation of a new rare earths supply chain

In a recent InvestorIntel interview, Tracy Weslosky speaks with Mark Chalmers, President and CEO of Energy Fuels Inc. (NYSE American: UUUU | TSX: EFR) and Constantine Karayannopoulos, President, CEO and Director of Neo Performance Materials Inc. (TSX: NEO) about their recent signing and launch of commercial shipments of rare earth product to Europe.

This significant news was accompanied by a physical shipment of commercial quantities of rare earths from Energy Fuels' White Mesa Mill in Utah to Neo Performance Materials' plant in Estonia and represents an important milestone in the creation of a new rare earths supply chain.

In this InvestorIntel interview, which may also be viewed on YouTube (click here to subscribe to the InvestorIntel Channel), Mark went on to say that Energy Fuels has surprised the world with its quick progress in the rare earths space. He added that Energy Fuels is capable to quickly ramp up rare earth carbonates production from monazite sand and is exploring opportunities to secure more sources of monazite sands. Constantine told InvestorIntel that rare earth

carbonates from Energy Fuels' White Mesa Mill in Utah will be processed into separated rare earth materials at Neo's Silmet rare earth separations facility for use in rare earth permanent magnets and other rare earth based advanced materials. He also explained how the deal creates a win-win situation for both Energy Fuels and Neo.
