Zentek CEO Greg Fenton talks about bringing new antimicrobial HVAC filters to market

written by InvestorNews | July 21, 2022
In this InvestorIntel interview with host Tracy Weslosky, Zentek Ltd.'s (NASDAQ: ZTEK | TSXV: ZEN) CEO and Director Greg Fenton talks about new opportunities and commercial applications for their unique Zenguard antimicrobial coating.

In the interview, which can also be viewed in full on the InvestorIntel YouTube channel (click here), Greg tells Tracy "we're focused quite acutely on the HVAC sector right now. We're testing our unique antimicrobial coating on HVAC filters. Our Zenguard coating has been demonstrated to be effective against most airborne pathogens." The interest in applying Zenguard to HVAC filters came out of a Canadian government call for new technologies to fight Covid-19, and Zentek won phase one of the challenges and is now onto phase two testing in real-world environments.

"If we're successful," Greg tells Tracy, "then the Government of Canada becomes an immediate client of ours and they will procure from us for a period of three years minimum." He continues that the person in charge of the government testing facility "has told us that he has not seen anything even close to what we've been able to achieve so far, so we're very excited about this and think we could have this product in the market later this year."
