

# Steve Saviuk on Valeo Pharma's Redesca, an injectable anticoagulant drug that just commenced shipment in Canada

In a recent InvestorIntel interview, Tracy Weslosky spoke with Steve Saviuk, CEO of Valeo Pharma Inc. (CSE: VPH | OTCQB: VPHIF) about the commercial launch of Valeo's low molecular weight heparin (LMWH) biosimilars – Redesca™ and Redesca HP™.

In this InvestorIntel interview, which may also be viewed on YouTube (click here to subscribe to the InvestorIntel Channel), Steve went on to say that Valeo has commenced shipments across Canada of Redesca™ and Redesca HP™ which are now covered under the Ontario Public Drug Benefit Program effective April 30, 2021. With Ontario representing 37% of the Canadian market for LMWHs, Steve explained the importance of listing of Redesca on the Ontario public formulary. He also spoke on the competitive advantages of Redesca which is an injectable anticoagulant drug with more than 8 years of proven in-market safety internationally and more than 150 million patient days treated in Europe alone.

# **Hugh Rogers on the European approval of the XPhyto Therapeutics point-of-care SARS-CoV-2 (COVID-19) RT-PCR test system**

In a recent InvestorIntel interview, Peter Clausi spoke with Hugh Rogers, CEO and Director of XPhyto Therapeutics Corp. (CSE: XPHY | OTCQB: XPHYF) about the European approval of XPhyto's point-of-care SARS-CoV-2 (COVID-19) RT-PCR test system ("Covid-ID Lab"). Covid-ID Lab is now registered within the European Union as a commercial in vitro diagnostic (CE-IVD) test.

In this InvestorIntel interview, which may also be viewed on YouTube ([click here to subscribe to the InvestorIntel Channel](#)), Hugh went on to say that the company went from concept to commercial approval in less than 12 months which is "unheard of in the biotech world." With a sample collection to result time of 25 minutes, "Covid-ID Lab combines the speed of a rapid screening test with the accuracy of a PCR diagnostic". Providing an update on the sales activities for XPhyto's RT-PCR test system Hugh said that the company is developing partnerships in Israel to pursue market access in the country and has recently commenced a pilot project in Germany with a well-known pharmacy currently running a COVID-19 test center.

## **Sixth Wave Innovations Dr Jon Gluckman on the colorimetric detection of SARS-CoV-2**

In a recent InvestorIntel interview, Tracy Weslosky spoke with Dr. Jon Gluckman, President, CEO and Founder of Sixth Wave Innovations Inc. (CSE: SIXW | OTCQB: ATURF) about the successful demonstration of colorimetric detection of SARS-CoV-2, the virus that causes COVID-19 utilizing Sixth Wave's Accelerated Molecular Imprinted Polymers ("**AMIPs**<sup>™</sup>") technology.

In this InvestorIntel interview, which may also be viewed on YouTube (click [here](#) to subscribe to the InvestorIntel Channel), Dr. Gluckman went on to say that colorimetric detection is a method of identifying the presence of a target substance within a test sample by means of a color reagent. He added that the Company is evaluating the detection

capabilities of the technology for all the active strains of SARS-CoV-2. Dr. Gluckman also provided an update on Sixth Wave's letter of intent with Halucenex Life Sciences Inc. to explore a collaboration for the separation of compounds such as psilocybin, baeocystin, and others using molecularly imprinted polymers.

To watch the full interview, [click here](#)

### **About Sixth Wave Innovations Inc.**

Sixth Wave is a nanotechnology company with patented technologies that focus on extraction and detection of target substances at the molecular level using highly specialized Molecularly Imprinted Polymers (MIPs). The Company is in the process of a commercial rollout of its Affinity™ cannabinoid purification system, as well as, IXOS®, a line of extraction polymers for the gold mining industry. The Company is in the development stages of a rapid diagnostic test for viruses under the Accelerated MIPs (AMIPs™) label.

Sixth Wave can design, develop and commercialize MIP solutions across a broad spectrum of industries. The company is focused on nanotechnology architectures that are highly relevant for the detection and separation of viruses, biogenic amines, and other pathogens, for which the Company has products at various stages of development.

**Thomas Smeenk on Hemostemix’s autologous stem cell therapy technology and why some call**

# it 'the fountain of youth'

In a recent InvestorIntel interview, Tracy Weslosky spoke with Thomas Smeenk, Co-Founder, President and CEO of Hemostemix Inc. (TSXV: HEM | OTC: HMTXF), about Hemostemix's autologous stem cell therapy and why he calls the technology "the fountain of youth."

In this InvestorIntel interview, which may also be viewed on YouTube (click here to subscribe to the InvestorIntel Channel), Thomas went on to say that Hemostemix's lead product ACP-01 works by treating ischemia (lack of blood circulation) in a patient's body. The technology has already been used to treat around 500 patients suffering from ischemia in the heart, arteries, and limb. He added that using the technology many patients were able to "save their limbs from otherwise certain amputations." Hemostemix has 91 patents including a patent on the automation of production which enables the company to scale the business "exponentially" as over a million patients lose their limbs to amputation in North America alone. The technology is now in Phase 2 clinical trial.

To watch the full interview, click here

## **About Hemostemix Inc.**

Hemostemix is a publicly traded autologous stem cell therapy company. A winner of the World Economic Forum Technology Pioneer Award, the Company developed and is commercializing its lead product ACP-01 for the treatment of CLI, PAD, Angina, Ischemic Cardiomyopathy, Dilated Cardiomyopathy and other conditions of ischemia. ACP-01 has been used to treat over 300 patients, and it is the subject of a randomized, placebo-controlled, double blind trial of its safety and efficacy in patients with advanced critical limb ischemia who have exhausted all other options to save their limb from

amputation.

On October 21, 2019, the Company announced the results from its Phase II CLI trial abstract entitled "Autologous Stem Cell Treatment for CLI Patients with No Revascularization Options: An Update of the Hemostemix ACP-01 Trial With 4.5 Year Followup" which noted healing of ulcers and resolution of ischemic rest pain occurred in 83% of patients, with outcomes maintained for up to 4.5 years.

The Company owns 91 patents across five patent families titled: Regulating Stem Cells, In Vitro Techniques for use with Stem Cells, Production from Blood of Cells of Neural Lineage, and Automated Cell Therapy.

## **Jack Lifton on how the lithium-ion battery material supply chain will determine if America can go EV**

In this episode of InvestorIntel's **Critical Materials Corner with Jack Lifton**, Jack talks about the lack of discussion about matching the supply and demand of lithium-ion battery materials in order to make an electric vehicle revolution possible.

In this InvestorIntel video, which may also be viewed on YouTube (click [here](#) to subscribe to the InvestorIntel Channel), Jack went on to say that lithium is the most essential component of any lithium-ion battery. He pointed out that the current world production of lithium is not sufficient to electrify all the vehicles of just the United States. "100%

electric car is not possible without a very large increase in the production of lithium worldwide," he added.

# Gold Newsletter's Brien Lundin on the recent rally in the price of gold

In a recent InvestorIntel interview, Tracy Weslosky spoke with Brien Lundin, Publisher and Editor of Gold Newsletter about the recent rally in the price of gold and the subsequent rise in interest in silver and junior mining stocks.

In this InvestorIntel interview, which may also be viewed on YouTube (click here to subscribe to the InvestorIntel Channel), Mr. Lundin went on to say that with the market floated with central bank liquidity around the world and very little optimism in the market "the stage is set for a new gold rally and we may actually be seeing that at this moment." Sharing his gold stock recommendations he also explained how a bull market in the precious metals sector affects junior mining stocks in other sectors like rare earths, uranium and base metals.

## **Darcy Taylor on the plan to double Leaf Mobile's robust portfolio of games**

In a recent InvestorIntel Interview, Tracy Weslosky spoke with Darcy Taylor, CEO of Leaf Mobile Inc. (TSX: LEAF) about the Leaf's busy start to 2021 with \$159M acquisition of East Side Games, a leading Canadian publisher and developer of mobile games, and signing partnerships with 4 additional gaming studios.

In this InvestorIntel video, which may also be viewed on YouTube (click here to subscribe to the InvestorIntel Channel), Darcy went on to say that Leaf has a robust portfolio of games which the company expects to double in the next 12 months. Speaking on the “incredible upside market potential” of mobile games, Darcy provided an update on Leaf’s IdleKit platform that helps professional developers to develop games faster and with reduced costs. He explained how the platform de-risks the full lifecycle of a game.

To watch the full video, click here

### **About Leaf Mobile Inc.**

LEAF Mobile Inc. is a leading free-to-play mobile game group, creating engaging games that produce enduring player loyalty. Their studio groups entrepreneurial culture is anchored in creativity, execution, and growth through a diverse portfolio of original and licensed IP mobile games that include: *Archer: Danger Phone*, *Bud Farm Idle Tycoon*, *Cheech & Chong Bud Farm*, *The Goldbergs: Back to the 80s*, *It’s Always Sunny: The Gang Goes Mobile*, *Trailer Park Boys Greasy Money* and the soon to be released, *RuPaul’s Drag Race Mobile Game*.
