

Critical Materials with Jack Lifton: The Driving Force for Demand, Miniaturization.

In this episode of the **Critical Materials Corner with Jack Lifton**, Jack starts with the 6000th anniversary of what #1 technology metal? We bet you know when your done listening. In today's **Critical Materials Corner**, Jack decides that we all know a little more on the history of critical materials and how we go to where we are today.

In this InvestorIntel video, which may also be viewed on YouTube (click here to subscribe to the InvestorIntel Channel), Jack tells us "miniaturization is the driving force for technological advancements" and explains how critical metals make miniaturization possible.

Jack sees copper is the most important technology metal of all because of its use in electricity transmission, "You can produce electricity in any number of ways, you can consume electricity in any number of ways but you can only transmit electricity with copper."

Jack points to geopolitics as the big problem for the supply of critical metals because of the non-uniform distribution of the metals throughout the world. The majority of accessible rare earths are in China, the majority of accessible cobalt is in Congo and the majority of copper is along the Pacific Coast of South America, all areas with substantial geopolitical risk.

Peter Clausi with Dr Richard Smith on GameStop, Robinhood and who really wins

In a recent InvestorIntel interview, Peter Clausi speaks with Dr. Richard Smith, Chairman of the Board and CEO of Foundation for the Study of Cycles about how “the rise in GameStop’s stock price is a middle finger to our traditional financial institutions.”

In this interview, Peter gets down to the brass tacks on how “this power play birthed by the groupthink of individual investors on Reddit’s r/WallStreetBets has cost hedge fund short-sellers billions of dollars and counting over the past two weeks...”

The Astrologers Fund Henry Weingarten forecasts gold, critical materials and Trump for fall

Henry Weingarten, Fund Director of The Astrologers Fund, Inc., spoke with InvestorIntel's Tracy Weslosky on near term prospects for gold and critical materials. "In November and December gold will do very well no matter who wins," Henry stated. He also commented on the likely market scenario if Donald Trump loses election.

Henry went on to say that President Trump's Executive Order on Critical Minerals will boost the critical minerals stocks in the short term and added, "Lithium is going double in 2022." He also said, "China will be very belligerent next year that will help military stocks. Military and security will be front and center next year."

Canadian Rare Earth Element Network Chair on building a

domestic supply chain

The Technology Metals Show host Jack Lifton talks with Ian London, Chair of Canadian Rare Earth Element Network (CREEN), about CREEN's collaborative network designed to accelerate the creation of a rare earths supply chain in Canada. The network brings together mineral exploration companies, academics, commercial and government laboratories, service providers and government representatives.

"It is a big industry, it is a long supply chain," Ian said. "We all have expertise but if we don't bring it together, we can't pull this together."
