Jack Lifton on how the lithium-ion battery material supply chain will determine if America can go EV

written by InvestorNews | April 26, 2021

In this episode of InvestorIntel's **Critical Minerals Corner with Jack Lifton**, Jack talks about the lack of discussion about matching the supply and demand of lithium-ion battery materials in order to make an electric vehicle revolution possible.

In this InvestorIntel video, which may also be viewed on YouTube (click here to subscribe to the InvestorIntel Channel), Jack went on to say that lithium is the most essential component of any lithium-ion battery. He pointed out that the current world production of lithium is not sufficient to electrify all the vehicles of just the United States. "100% electric car is not possible without a very large increase in the production of lithium worldwide," he added.
