# Maritz Smith on Alphamin Resources' extraordinary low-cost high-grade producing tin mines

written by InvestorNews | March 14, 2022

In a recent InvestorIntel interview, Byron King spoke with Maritz Smith, CEO of Alphamin Resources Corp. (TSXV: AFM) about achieving record fourth quarter EBITDA and production, and about how Alphamin is positioned to become one of the world's largest low-cost tin producers.

In this InvestorIntel interview, which may also be viewed on YouTube (click here to subscribe to the InvestorIntel Channel), Maritz Smith said that tin is a strategic metal "without which technology cannot exist" and went on to highlight the supply constraints in the tin market because of decades of underinvestment in exploration and development of new tin mines. "Alphamin's mine is the first major tin mine that has been developed in the last 40 years," he added. As a producer of 4% of the world's mined tin, Maritz provided an update on Alphamin's maiden mineral resource estimate and positive PEA for their Mpama South Mine.

**About Alphamin Resources Corp.**

Alphamin Resources is a low-cost tin concentrate producer from its high-grade deposit at Mpama North. This is on its mining license, and it has an additional five exploration licenses covering a total of 1,270km$^2$ in the North Kivu Province of the

Democratic Republic of Congo (DRC). Alphamin is headquartered in Mauritius and listed both on the Toronto Stock Exchange (TSXV: AFM) and on the Johannesburg Stock Exchange AltX (JSE AltX: APH). At a tin grade of roughly 4.5%, Mpama North is the world's highest-grade producing tin resource – about four times higher than most other operating tin mines in the world. The Mpama North mine is in production. It has an output of ~10 000 tonnes of contained tin per annum, amounting to ~3% of the world's mined tin supply. Alphamin is aiming to increase annual tin output and life of mine through incremental production from Mpama South and by adding more mines in close proximity to the current producer from within its licensed footprint. The management team has successfully developed and brought the Bisie tin mine into production and is focused on taking the business to the next level as they pursue their objective of realizing the full value potential of this extraordinary tin complex.
