

John Cash on how Ur-Energy's patented technology provides real cost savings for U3O8 producers

written by InvestorNews | December 16, 2022

In this InvestorIntel interview, Tracy Weslosky interviews [Ur-Energy Inc.](#)'s (NYSE American: URG | TSX: URE) CEO, Chairman, and President John Cash about Ur-Energy's successful [Phase 1 field testing](#) on its patented injection well casing and installation technology. With an 85% reduction in casing cost, John says that the technology results in significant cost savings per pound of U_3O_8 produced.

Over the course of the interview, John discusses some of the environmental benefits of the technology which include the following.

- Reduction of heavy vehicle traffic since **drill rig time on injection wells is reduced from approximately 3.5 to 0.5 days** per well as demonstrated during initial field tests;
- Up to **85% fewer air emissions** during installation of injection wells;
- Less noise due to shortened drill rig and water truck time;
- A further reduction in already low well failure rates due to fewer points of potential failure, because the casing material is "tougher" in many respects than conventional PVC well casing, and the completion method requires less exposure to the drill string and bit compared to conventional methods

John goes on to share how the technology can potentially be applied across the in-situ recovery industry including copper, lithium, soda ash, potash, and other soluble minerals.

About Ur-Energy Inc.

Ur-Energy is a uranium mining company operating the Lost Creek *in-situ* recovery uranium facility in south-central Wyoming. We have produced, packaged, and shipped approximately 2.6 million pounds U_3O_8 from Lost Creek since the commencement of operations. Ur-Energy has all major permits and authorizations to begin construction at Shirley Basin, the Company's second *in situ* recovery uranium facility in Wyoming and is in the process of obtaining remaining amendments to Lost Creek authorizations for expansion of Lost Creek. Ur-Energy is engaged in uranium recovery and processing activities, including the acquisition, exploration, development, and operation of uranium mineral properties in the United States. The primary trading market for Ur-Energy's common shares is on the NYSE American under the symbol "URG." Ur-Energy's common shares also trade on the Toronto Stock Exchange under the symbol "URE." Ur-Energy's corporate office is in Littleton, Colorado and its registered office is in Ottawa, Ontario.
