

Raymond Ashley of F3 Uranium Discusses the “Newest High-Grade Uranium Discovery” & \$8M Drill Program

written by InvestorNews | March 20, 2023

In this InvestorIntel interview during PDAC 2023, Byron W King talks to [F3 Uranium Corp.](#)'s (TSXV: FUU | OTCQB: FUUFF) VP Exploration Raymond Ashley about how F3 Uranium has “made the Athabasca Basin’s newest high-grade uranium discovery.” Raymond discusses F3 Uranium’s drill program to grow the newly discovered JR Zone located on their Patterson Lake North (“PLN”) Property in the Athabasca Basin. The JR Zone was discovered during a fall 2022 drill program with a discovery hole that assayed 6.97% U3O8 over 15.0 metres. The company then raised \$8 million for a 20-hole follow-up [winter drill program](#) that is currently in progress.

Raymond goes on to highlight the competitive advantages of their project’s location being in proximity to large uranium discoveries such as Fission Uranium’s Triple R Project and NexGen Energy’s Arrow uranium deposits. Led by a team responsible for 3 major uranium discoveries in the Athabasca Basin, Raymond says that F3 Uranium has a portfolio of 16 exploration properties in the Athabasca Basin.
