

# Avalon CEO presents an “advanced lithium development opportunity” in Ontario

In a recent presentation at InvestorIntel’s 6th Annual Technology Metals Summit, Don Bubar, President and CEO of [Avalon Advanced Materials Inc.](#) (TSX: AVL | OTCQX: AVLNF) delivered a presentation titled, “The Separation Rapids Lithium Project: An Advanced Lithium Development Opportunity in North-western Ontario”. Addressing industry and investors alike, Don provides an overview of Avalon’s multi-market opportunity with The Separation Rapids Lithium Project, which is rich in petalite and lepidolite. Avalon’s competitive advantage is their ability to either sell petalite into the glass-ceramics market, or process it into lithium hydroxide (along with lithium carbonate from lepidolite) for the battery market... to access the complete presentation, [click here](#)
