

# Dev Randhawa on the 'significant increase' in the uranium spot price and Fission's world class Triple R Project

written by InvestorNews | April 21, 2020

"Triple R (uranium deposit) ticks the boxes that no other deposit does. It is in the right place, Canada, more importantly we are in Saskatchewan (Athabasca Basin region) where they are pro-mining and pro-business. So we are in the right jurisdiction. It is a shallow deposit, just 50m from surface, it is high grade with over 100 million pounds...and now that the risk of funding is out of the way, I think that is why the stock has performed well." States Dev Randhawa, Chairman and CEO of [Fission Uranium Corp.](#) (TSX: FCU | OTCQX: FCUUF), in an interview with InvestorIntel's Peter Clausi.

Dev went on to say that the western utility companies rely heavily on foreign sources and the spot market for their uranium supply. He considers it to be very short term and a poor strategy. He said that roughly 50% of the uranium transactions are on the spot market. Now with mines closing down in Kazakhstan and elsewhere and because of the coronavirus pandemic about 54% of the monthly uranium supply has been taken out. This has caused the [spot price of uranium](#) to go up significantly. He continued by saying that uranium will emerge a winner from this coronavirus outbreak.

Dev also said that the world needs energy and uranium plays a big part to have clean energy available. It is the only energy

source which can provide base load without leaving a footprint. If we want a cleaner energy source uranium has to be a part of it.
