Happy Creek CEO on advancing their Fox tungsten project

written by InvestorNews | March 21, 2018

March 21, 2018 – "It is going to be a busy year. We are expecting to be able to tell the shareholders that this is going to be a big year for us, a massive advance. We are very comfortable with our tungsten asset advancing…" states David Blann, CEO, President and Director of Happy Creek Minerals Ltd.(TSXV: HPY), in an interview with InvestorIntel's Jeff Wareham.

Jeff Wareham: A couple of metals that you have got in your portfolio I have not really talked to anyone about this week, copper and tungsten; two of my favorites. Where is your focus this year?

David Blann: This year we are looking at advancing our Fox tungsten project into more advanced development stages. We just recently announced a resource for the tungsten project that is among the highest grade in the western world. It is a brand new discovery. We also have a great copper asset located in the Highland Valley district of British Columbia, which is home to Teck Resources' Highland Valley Mine, Canada's largest producer.

Jeff Wareham: You have already put out the resource. What should investors be looking for this year?

David Blann: This year we are advancing the Fox tungsten project in two directions. First we have to start all the baseline studies towards more feasibility related work and then we are also conducting exploration to expand our existing resource.

Jeff Wareham: Are you financed for all the development you have

to do?

David Blann: We are close to financed up for all that. In fact that is partly where the idea for our Highland Valley is we are getting a lot of interest in our copper project. It is in a world-class mining district. We are seeing a strong interest for that project so we are looking to leverage that asset into financial position to allow us to develop the Fox project.

Jeff Wareham: From the looks of it that really is in the land of the big boys, would it not?

David Blann: Oh yeah. It is as good as any big major copper project around the world.

Jeff Wareham: Good stuff. Investors should be looking for lots of news coming out of you this year.

David Blann: It is going to be a busy year. We are expecting to be able to tell the shareholders that this is going to be a big year for us, a massive advance. We are very comfortable with our tungsten asset advancing and we also feel that the copper project could be the right time and place for that project to get dealt with…to access the complete interview, click here
