

# InvestorIntel Interviews Christopher Ecclestone on the Hallgarten Report titled “Riding the Wave of Resurgent Tin”

written by InvestorNews | April 9, 2021

In a recent InvestorIntel interview, Peter Clausi spoke with Christopher Ecclestone, Principal and mining strategist at Hallgarten & Company about initiating an analyst coverage on [Alphamin Resources Corp.](#) (TSXV: AFM) titled [Riding the Wave of Resurgent Tin.](#)

In this InvestorIntel interview, which may also be viewed on YouTube ([click here to subscribe to the InvestorIntel Channel](#)), Christopher highlighted the shortage of tin because of years of underinvestment in the sector and big alluvial deposits in Malaysia and Indonesia running out of resources. “Most of the tin deposits are under 1%,” he said. With a tin grade of roughly 4.5%, Alphamin’s Mpama North is the world’s highest-grade tin resource – about four times higher than most other operating tin mines in the world. Christopher said that with Alphamin producing about 4% of the world’s mined tin it is the “first new tin major since the 1970s.”

## About Hallgarten & Company

Hallgarten & Company was founded in 2003 by the former partners of a well-known economic think-tank. Their output encompasses

top-down and bottom-up research from a Classical Economic (Austrian School) perspective. Over the years, the team has successfully picked trends using our macroeconomic underpinnings to guide investors through the treacherous waters of the markets. It was only natural, in light of the focus of Classical Economics upon the “real value” of monetary assets that the firm’s strengths should ultimately have become evident in resources sectors and projections of commodity trends.

Hallgarten & Company has advised and managed portfolios of offshore and onshore hedge funds.

Hallgarten also provides consultancy services on Latin American economic, politics and corporate matters including the production of bespoke research.

### **About Alphamin Resources Corp.**

Alphamin Resources is a low cost tin concentrate producer from its high grade deposit at Mpama North. This is on its mining license and it has an additional five exploration licenses covering a total of 1,270km<sup>2</sup> in the North Kivu Province of the Democratic Republic of Congo (DRC). Alphamin is headquartered in Mauritius and listed on the Toronto Stock Exchange (TSXV: AFM) and the Johannesburg Stock Exchange AltX (JSE AltX: APH). At a tin grade of roughly 4.5%, Mpama North is the world’s highest-grade tin resource – about four times higher than most other operating tin mines in the world. The Mpama North mine is in production. It has an output of ~10 000 tonnes of contained tin per annum, amounting to ~3% of the world’s mined tin supply. Alphamin are aiming to increase annual tin output and life of mine through incremental production from Mpama South and by adding more mines in close proximity to the current production and from within our licensed footprint. Their management team has successfully developed and brought the Bisie tin mine to

production and is focused on taking the business to the next level as they pursue their objective of realising the full value potential of this extraordinary tin complex.
