

Peter Clausi on Silver Bullet Mines assay results and oversubscribed financing

In this InvestorIntel interview with host Chris Thompson, Silver Bullet Mines Corp.'s (TSXV: SBMI) VP Capital Markets and Director Peter Clausi provides an update on the recent assay results from Silver Bullet Mines' Buckeye Mine in Arizona which returned values as high as 24,226 g/t silver.

In the interview, which can also be viewed in full on the InvestorIntel YouTube channel ([click here](#)), Peter Clausi talks about the production timeline for the Buckeye Silver Mine with pilot silver production anticipated within 2 months. Peter also talks about Silver Bullet Mines' recently closed financing which was significantly oversubscribed, and provides an update on Silver Bullet Mines' high-grade past-producing Washington gold-silver mine in Idaho.

About Silver Bullet Mines Corp.

Silver Bullet Mines Corp. is a silver and copper exploration and development company with projects in the western USA. Their flagship project is the Black Diamond, close to 5,000 acres in the Miami-Globe copper camp and centered on the Richmond Basin. The basin is the site of the original 1870s native silver discoveries that brought prospectors to the now significant Globe copper camp. The story goes that a scouting party was fired upon by Apache Indians using bullets made of hammered native silver. Thus inspiring the company name – Silver Bullet Mines. The Richmond Basin is the location of several historic high grade silver-copper mines including: McMorris, La Plata, Helena, Silver Sevens, Buckeye and

numerous associated prospects. Little work or extraction came from this area since the early 20th century as the camp focused on big copper mines. But these mine anchor this section of what is called the Arizona Silver Belt that extends from the famous Silver King near Superior, AZ and parallels the trend of the major copper deposits including the Magma mine. They believe the high grade silver is still there waiting for discovery.
