Tom Drivas on Appia's Alces Lake Rare Earths Project with world-class grades

written by InvestorNews | March 20, 2020

"Appia is concentrating on the Alces Lake Project…It has world-class grades. We see grades up to 49-50% rare earths and a quarter of that is critical rare earths like neodymium and praseodymium." States Tom Drivas, CEO, President and Director of Appia Energy Corp. (CSE: API | OTCQB: APAAF), in an interview with InvestorIntel's Alastair Neill at PDAC 2020.

Tom went on to say that the Alces Lake Project has up to 80% monazite right on the surface making it the highest grade deposit in North America in terms of monazite and in terms of rare earths one of the highest grades in the world. The company is currently working with Saskatchewan Research Council (SRC) to advance the project into the next level in terms of processing.
