

# InvestorIntel Week in Review for June 13-20, 2022

Ever imagine what the world would look like if you closed your eyes and then saw the world 2 years later?

Last week's PDAC 2022 was like opening a musty cupboard that has been closed too long. Likewise, it felt like a bad case of *Back to the Future* in that it was post-PDAC 2020 when the world shut down, I recall when we were all abuzz over who had spread COVID during that event.

Tired, and out of shape, there was an occasional dramatic betterment, as both George A. Brown and George Bauk of PVW Resources Limited (ASX: PVW) could attest to. Both confessed to substantial life changes and had left good solid poundage aside for exercise and nutrition. They both looked younger.

With our new Publisher and Editor in Chief Stephen Lautens onside this year, along with Byron W King, and Clint Adam Smyth on Stage 1, Level 700 for 3 days at the Metro Convention Centre: we completed 7 panels and we should have all these live by end of the week this week.

This morning? Jack Lifton has a story he is working on an opinion on the "USD\$120 million by the U.S. Department of Defense to Australia's Lynas Rare Earths Limited (ASX: LYC) to cover the costs of constructing what is referred to as a 'heavy rare earths' processing (separation) plant in the USA." And I am tracking down the 3 companies that are referenced in Byron W King's most recent piece on his highlights from PDAC. My favorite participants? I need one more week to drill through all the business cards, and do my research, and then, am happy to share some interesting facts that I surmised from my time during this event... including the resounding theme of Copper, Gold and – uranium! Plus, when did Jamaica start

advertising rare earths?

We have the benefit of news flow, analysts and journalists communicating with us endlessly. Starting this week and moving forward, let me send you some of the highlights I review, including re-reviewing this week's upcoming InvestorTalk.com schedule, which includes:

**InvestorTalk.com Schedule for June 21-23 (Click Here to RSVP):**

- Tuesday, June 21 from 9-920 AM EST – InvestorTalk.com with Brent Willis from Voyageur Pharmaceuticals Ltd. (TSXV: VM)
