About Cannabis Technologies (“CTI”)

CTI is a biopharmaceutical drug discovery and development company uniquely focused on the therapeutic potential of cannabinoids. The company consists of two divisions:

Drug Discovery & Development – CTI is utilizing its proprietary **“Cannabinoid Drug Design Platform”** to identify new bioactive compounds within the marijuana plant that interact with certain gene responsible for specific diseases. CTI’s extensive research and intellectual properties will initially be focused on the development of several new cannabinoid based treatments for glaucoma, cancer & angiogenesis, Inflammation and pain.

Cultivation & Breeding – CTI’s botanical research division has begun the research & development into the individual strains and clones that will produce the raw material bases for future pharmaceutical research. To comply with the demands of the Pharmaceutical industry, a phytopharmaceutical feedstock must meet high expectations regarding the minimum and maximum content of a range of compounds. Cultivation techniques and pharmaceutical levels of exacting chemical consistency are

critical for all applications to regulatory authorities.
