

# EMC Secures New Property in NSW, Australia

April 2, 2014 (Source: Businesswire) – **EMC Metals Corp. (the “Company” or “EMC”) (TSX: EMC)** announces that it has secured a 100% interest in an exploration license (EL 7977) covering 34.7 square kilometers in New South Wales (NSW), Australia. The license area is located approximately 24 kilometers west-southwest from EMC’s Nyngan Scandium Project and approximately 36 kilometers southwest from the town of Nyngan, NSW. The license area covers part of the Honeybugle geologic complex, and will carry that name in our future references to the property. The ground was released by the prior holder, and EMC intends to explore the property for scandium and other metals.

## **About EMC Metals**

EMC is focused on specialty metals resources and project development, specifically scandium. The Company owns rights to a 100% interest in the Nyngan Scandium Project, in New South Wales, Australia, to be fully secured by a second progress payment of A\$1.4M to the former owner, in June 2014. The Company filed a NI 43-101 Measured and Indicated Resource on the Nyngan Project in 2010, and has completed and announced by press release extensive metallurgical test work on the resource. In addition, EMC owns a 100% interest in the Tordal Scandium/REE property in Norway, where we continue our exploration efforts, specifically for scandium and REE minerals.

The technical information in this news release has been reviewed by Willem Duyvesteyn, a Qualified Person as defined by National Instrument NI 43-101. Mr. Duyvesteyn is employed by EMC Metals Corp.
