

# NexGen commences summer drilling program at Arrow, Rook I

May 29, 2014 (Source: CNW) – NexGen Energy Ltd. (TSX-V: NXE) (“NexGen” or the “Company”) is pleased to announce it has received its permits to commence summer drilling at Arrow and the land based geophysical targets located in the western section of Rook I. Three rigs are at site and will commence drilling in the coming days. Drilling is planned to continue throughout the summer to October 2014.

The program will focus primarily on expanding the area of basement mineralization at Arrow discovered in February 2014. In only 8 holes, the Arrow mineralized zone has extended to approximately 215m along a NE-SW strike zone and is open in all directions and at depth. Secondly, a heli-rig will focus on testing the identified geophysical targets in the western section of Rook I covering the Dirksen Trend, a known uranium mineralized fault zone.

Leigh Curyer, CEO commented, “The team has been eagerly awaiting the re-commencement of drilling at Arrow. The results at the end of the winter drilling program at Arrow are extremely encouraging with respect to the system hosting substantial basement mineralization at shallow depth. Assays from the winter program at Arrow are expected shortly. Further, the team is looking forward to testing the other land based identified geophysical targets on the highly prospective Rook I project.”

## About NexGen

NexGen is a British Columbia corporation with a focus on the acquisition, exploration and development of Canadian uranium projects. NexGen has a highly experienced team of exploration

professionals with a track record in the discovery of unconformity-style uranium deposits in Canada.

NexGen owns a portfolio of highly prospective uranium exploration assets in the Athabasca Basin, Saskatchewan, Canada, including a 100% interest in Rook 1, location of the Arrow Discovery, immediately adjacent to the north east of Patterson Lake South, and an option to earn a 70% interest in the Radio Project, immediately adjacent to Rio Tinto's Roughrider Deposit.

#### Forward-Looking Information

*This news release contains "forward-looking information" within the meaning of applicable Canadian securities laws. Generally, but not always, forward looking information is identifiable by the use of words such as "will" and "planned" and similar expressions. Forward-looking information is based on the then current expectations, beliefs, assumptions, estimates and forecasts about the Company's business and the industry and markets in which it operates. Such information is not a guarantee of future performance and undue reliance should not be placed on forward-looking information. Assumptions and factors underlying the Company's expectations regarding forward-looking information contained herein include, among others: that general business and economic conditions will not change in a material adverse manner; that financing will be available if and when needed on reasonable*

terms; that the Company's current exploration activities can be achieved and that its other corporate activities will proceed as expected; that third party contractors, equipment and supplies and governmental and other approvals required to conduct the Company's planned exploration activities will be available on reasonable terms and in a timely manner.

Although the assumptions made by the Company in providing forward looking information are considered reasonable by management at the time the forward-looking information is given, there can be no assurance that such assumptions will prove to be accurate. Forward-looking information also involves known and unknown risks and uncertainties and other factors, which may cause actual events or results in future periods to differ materially from any projections of future events or results expressed or implied by such forward-looking information, including, among others: risks related to the availability of financing on commercially reasonable terms and the expected use of the proceeds; changes in the market; potential downturns in economic conditions; industry conditions; actual results of exploration activities being different than anticipated; changes in exploration programs based upon results of exploration; future prices of metal; availability of third party contractors; availability of equipment and supplies; failure of equipment to operate as anticipated; accidents, effects of weather and other natural phenomena and other risks associated with the mineral exploration industry; environmental risks; changes in laws and regulations; community relations; and delays in obtaining governmental or other approvals or financing. There can be no assurance that forward-looking information will prove to be accurate, as actual results and future events could differ materially from those anticipated, estimated or intended. NexGen undertakes no obligation to update or reissue forward-looking information as a result of new information or events except as required by applicable securities laws.
