“We are excited to have the opportunity to keep all shareholders and interested investors up to date on our Palladium and Cobalt assets. We have two very exciting projects and its important to give shareholders an opportunity to learn and grow with the company.” President & CEO, Wayne Tisdale.

## 21C Asset Highlights:

**Tisova Project:** (Location: Czech/German): The Tisova VMS horizons appear to occur within a 100m thick assemblage termed the Tisova Horizon. 21C Metal’s geologists, working with recognized world experts in VMS deposits, have developed a preliminary exploration signature for copper/cobalt on the property. It is currently thought that there may be as much as a prospective 30 km belt.

**East Bull property:** (Ontario, Canada): Analysis and testing of the historical exploration has resulted in a 43-101 compliant

resources estimate of 11.1m tonnes of ore at a grade of 1.46g/t PdEq for a total of 523,000 ounces of Palladium. The independent analysis of the updated 43-101 also highlighted the potential significant upside potential for the resource estimate after further exploration.

### **Reader Advisory**

This news release contains certain "forward-looking information" within the meaning of applicable securities law. Forward-looking information is frequently characterized by words such as "plan", "expect", "project", "intend", "believe", "anticipate",

“estimate” and other similar words, or statements that certain events or conditions “may” or “will” occur. In particular, forward-looking information in this press release includes, but is not limited to, statements with respect to the proposed exploration program on the Property. Although we believe that the expectations reflected in the forward-looking information are reasonable, there can be no assurance that such expectations will prove to be correct. We cannot guarantee future results, performance or achievements. Consequently, there is no representation that the actual results achieved will be the same, in whole or in part, as those set out in the forward-looking information.

Forward-looking information is based on the opinions and estimates of management at the date the statements are made and are subject to a variety of risks and uncertainties and other factors that could cause actual events or results to differ materially from those anticipated in the forward-looking information. Some of the risks and other factors that could cause the results to differ materially from those expressed in the forward-looking information include, but are not limited to: general economic conditions in Canada and globally; industry conditions, including governmental regulation and environmental regulation; failure to obtain industry partner and other third party consents and approvals, if and when required; the availability of capital on acceptable terms; the need to obtain required approvals from regulatory authorities; stock market volatility; liabilities inherent in mining operations; competition for, among other things, skilled personnel and supplies; incorrect assessments of the value of acquisitions; geological, technical, processing and transportation problems; changes in tax laws and incentive programs; failure to realize the anticipated benefits of acquisitions and dispositions; and the other factors. Readers are cautioned that this list of risk

factors should not be construed as exhaustive.

The forward-looking information contained in this news release is expressly qualified by this cautionary statement. We undertake no duty to update any of the forward-looking information to conform such information to actual results or to changes in our expectations except as otherwise required by applicable securities legislation. Readers are cautioned not to place undue reliance on forward-looking information.

Neither the Canadian Securities Exchange nor its Regulation Services Provider accepts responsibility for the adequacy or accuracy of this release.
