

DCS and Bluesky Communications Launch MiFleet in American Samoa

written by Raj Shah | May 3, 2021

May 3, 2021 ([Source](#)) – **DCS (OTCQX: DCSX) (CSE: DCSI)** a leading provider of IoT products and solutions, announced today that it has partnered with Bluesky Communications to offer MiFleet to Bluesky customers. The initial deployment between the companies will be to upgrade 300+ vehicles across the Bluesky Communications network footprint. MiFleet removes complexities and costs from fleet management strategies and will provide Bluesky Communications customers with an iconic, intuitive and interactive cloud-based fleet management platform, that is highly customizable to fit the real-time needs of the Bluesky customer base.

“Partnering with Bluesky Communications in American Samoa is another example of how our IoT solutions can enable carriers in any region,” said Chris Bursey, CEO of DCS. “This partnership will provide Bluesky with the latest IoT technology to enable their fleet, as well as their customers’ fleet needs. Our solutions will enable Bluesky Communications to leverage MiFleet as the foundation to roll out additional IoT solutions in the future, such as sensors.”

“As the superior network in American Samoa, partnering with DCS takes Bluesky to another level of bringing the latest IoT technology into the hands of our customers by using state of the art technology. MiFleet will enable Bluesky to open new opportunities to our business and residential consumers to better track and manage their assets,” said Justin Tuiasosopo, CEO of Bluesky Communications.

About Bluesky Communications
