

# DCS Launches MiSensors for Monitoring Intelligent Devices

written by Raj Shah | September 22, 2020

September 21, 2020 ([Source](#)) – **DCS (OTCQB: DCSX) (CSE: DCSI)** announced today the release of MiSensors, a cloud-based platform and end-user web application to monitor IoT device and sensor data. MiSensors transforms data into real-time business intelligence to help business owners efficiently run their operations. Built upon a scalable and open architecture, MiSensors can support virtually any IoT device or sensor regardless of the technology. MiSensors can easily support any vertical markets such as hospitality, bars and restaurants, asset management and server rooms. MiSensors allows any business the ability to deploy an IoT sensor ecosystem and take advantage of the big data to make better business decisions.

“When we started the development process, we did so with the understanding that not all businesses are alike and many have different needs and requirements,” said Eric Placzek, CTO of DCS. “We listened to the market and designed MiSensors so that it was open to all device and sensor manufactures in the market today. The web services API allows developers and system integration partners access device and sensor data to enhance their solutions.”

“Launching MiSensors is a milestone achievement for DCS and it gives us the flexibility to drive future innovation in the IoT device and sensor monitoring space,” said Dave Scowby, COO of DCS. “Most business owners don’t know how much data they can have access to and MiSensors will give them the real-time data to identify a problem before it becomes a disaster.”

sensor integration, visit [www.misensors.com](http://www.misensors.com)

### **About DCS**

DCS is a technology solutions integrator focusing on connecting the Internet of Things. We provide real solutions that solve real problems. Our software applications and scalable cloud services collect and assess business-critical data from all types of assets. DCS is headquartered in San Diego, California and is publicly traded on the OTCQB (“DCSX”) and Canadian Securities Exchange (“CSE”). For more information, visit [www.dcsbusiness.com](http://www.dcsbusiness.com)

DCS and the DCS logo are among the trademarks of DCS in the United States. Any other trademarks or trade names mentioned are the property of their respective owners.

### **Forward-Looking Statements**

This release contains forward-looking statements, which reflect management’s current views of future events and operations. These statements are based on current expectations and assumptions that are subject to risks and uncertainties that could cause actual results to differ materially. We believe that these potential risks and uncertainties include, without limitation: the ongoing COVID-19 pandemic, the Company’s dependence on third-party manufacturers, suppliers, technologies and infrastructure; risks related to intellectual property; industry risks including competition, online security, government regulation and global economic conditions; and the Company’s financial position and need for additional funding. Statements in this release should be evaluated in light of these factors. These risk factors and other important factors that could affect our business and financial results are discussed in our Management’s Discussion and Analysis, periodic reports and other public filings which are available on SEDAR

at [www.sedar.com](http://www.sedar.com) and posted with the OTC Disclosure and News Service. DCS undertakes no duty to update or revise any forward-looking statements.
