The Amvest Capital webinar will be held on Wednesday August 4th @ 4:05 pm ET/ [1:05 pm PT](#). Global Energy Metals invites individual and institutional investors, as well as advisors and analysts, to attend this real-time, interactive live webinar by [registering here](#).

Global Energy Metals is developing a strong, diversified portfolio of strategic battery mineral projects that are well positioned for further exploration and development at a time when there is renewed interest in the battery minerals sector as price fundamentals are realigning due to the much anticipated surge in demand and market growth that is supported by a global movement towards electric vehicle and new energy storage adoption.

Global Energy Metals' current portfolio of cobalt, copper and nickel holdings is well exposed to this global transition towards a lower-carbon economy and provides a way for shareholders to leverage the electrification mega-trend.

About Amvest Capital

Amvest Capital is a New York-based specialist investment management and corporate finance firm focused solely on the natural resources sector. You can learn more about Amvest Capital and its webinars at <https://www.amvestcapital.com/webinars>.

[Global Energy Metals Corporation](#)

(TSXV:GEMC | OTCQB:GBLEF | FSE:5GE1)

Global Energy Metals Corp. offers investment exposure to the growing rechargeable battery and electric vehicle market by building a diversified global portfolio of exploration and growth-stage battery mineral assets.

Global Energy Metals recognizes that the proliferation and growth of the electrified economy in the coming decades is underpinned by the availability of battery metals, including cobalt, nickel, copper, lithium and other raw materials. To be part of the solution and respond to this electrification movement, Global Energy has taken a 'consolidate, partner and invest' approach and in doing so have assembled and are advancing a portfolio of strategically significant investments in battery metal resources.

As demonstrated with our current copper, nickel and cobalt projects in Canada, Australia, Norway and the United States, we're investing-in, exploring and developing prospective, scaleable assets in established mining and processing jurisdictions in close proximity to end-use markets. We're targeting projects with low logistics and processing risks, so that they can be fast tracked to enter the supply chain in this cycle. We're also collaborating with industry peers to strengthen our exposure to these critical commodities and the associated technologies required for a cleaner future.

Securing exposure to these critical minerals powering the eMobility revolution is a generational investment opportunity. We believe the the time to be part of this electrification movement.

Cautionary Statement on Forward-Looking Information:

Certain information in this release may constitute forward-looking statements under applicable securities laws and necessarily involve risks associated with regulatory approvals and timelines. Although Global Energy Metals believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results or developments may differ materially from those in the forward-looking statements. Except as required by law, the Company undertakes no obligation to update these forward-looking statements in the event that management's beliefs, estimates or opinions, or other factors, should change.

GEMC's operations could be significantly adversely affected by the effects of a widespread global outbreak of a contagious disease, including the recent outbreak of illness caused by COVID-19. It is not possible to accurately predict the impact COVID-19 will have on operations and the ability of others to meet their obligations, including uncertainties relating to the ultimate geographic spread of the virus, the severity of the disease, the duration of the outbreak, and the length of travel and quarantine restrictions imposed by governments of affected countries. In addition, a significant outbreak of contagious diseases in the human population could result in a widespread health crisis that could adversely affect the economies and financial markets of many countries, resulting in an economic downturn that could further affect operations and the ability to finance its operations.

For more information on Global Energy and the risks and challenges of their businesses, investors should review the filings that are available at www.sedar.com.
