

Granada Gold Closes \$1,350,000 Flow-Through and Unit Private Placement

written by Raj Shah | September 28, 2021

September 27, 2021 ([Source](#)) – Granada Gold Mine Inc. (TSXV:GGM) (OTC:GBBFF) (the “Company” or “Granada”) announces that the Company has closed a non-brokered private placement by way of issuing 7,857,143 Quebec flow-through units (“QFT Units”) at a price of \$0.14 per QFT Unit raising gross proceeds of \$1,100,000. The Company will also be issuing 2,500,000 units (“Units”) at a price of \$0.10 per Unit raising gross proceeds \$250,000. The Company is raising a total of \$1,350,000.

Each QFT Unit is comprised of one flow-through common share of the Company and one half of one share purchase warrant. Each whole warrant will entitle the holder thereof to purchase one additional common share of the Company at an exercise price of \$0.20 per share, for a period of two years from closing, subject to TSX Venture Exchange (“Exchange”) approval.

Each Unit is comprised of one common share of the Company and one half of one share purchase warrant. Each whole warrant will entitle the holder thereof to purchase one additional common share of the Company at an exercise price of \$0.15 per share, for a period of three years from closing, subject to Exchange approval.

The proceeds of the FT and Unit Private Placement will be used for surface exploration, trenching, and historical resampling of drill core on the Company’s Granada Gold Property in Québec and for general working capital purposes.

GloRes Securities Inc., the lead finder for the financing, was paid \$94,500 in cash and 550,000 finder's warrants. An additional 175,000 finder warrants were also paid. The finder's warrants are on the same terms as the QFT warrants. The finder's fees paid in connection with the private placement are subject to Exchange approval.

All securities issued in connection with the private placement will be subject to a four-month and a day hold period expiring on January 28, 2022 in accordance with applicable Canadian Securities Laws.

About Granada Gold Mine Inc.

Granada Gold Mine Inc. continues to develop the Granada Gold Property near Rouyn-Noranda, Quebec. Approximately 120,000 meters of drilling has been completed to date on the property, focused mainly on the extended LONG Bars zone which trends 2 kilometers east-west over a potential 5.5 kilometers of mineralized structure. The highly prolific Cadillac Break, the source of more than 75 million plus ounces of gold production in the past century, cuts through the north part of the Granada property, but is not necessarily indicative of mineralization hosted on the company's property.

The Granada Shear Zone and the South Shear Zone contain, based on historical detailed mapping as well as from current and historical drilling, up to twenty-two mineralized structures trending east-west over five and a half kilometers. Three of these structures were mined historically from four shafts and three open pits. Historical underground grades were 8 to 10 grams per tonne gold from two shafts down to 236 m and 498 m with open pit grades from 3.5 to 5 grams per tonne gold.

Updated Mineral Resource

The updated resource at the Company's Granada Gold project in Rouyn-Noranda, Quebec was estimated by SGS Canada and outlined in a January 29, 2021 news release. The final report was filed March 15, 2021 with an Effective date of December 15, 2020. The 43-101 Technical Report is titled: Granada Gold Project Mineral Resource Estimate Update, Rouyn-Noranda, Quebec, Canada authored by Yann Camus, P.Eng. and Maxime Dupéré, B.Sc, géo. Both of SGS Canada Inc.

Updated Mineral Resource Estimate Base Case with Details Between the Open Pit Portion and the Underground Portion

Type	Category	Tonnes	Au (g/t)	Gold Ounces
In Pit	Measured ¹	3,756,000	1.89	228,000
	Indicated	1,357,000	2.55	111,000
	Measured+Indicated	5,113,000	2.06	339,000
	Inferred	34,000	11.29	12,000
Underground	Measured	37,000	4.22	5,000
	Indicated	807,000	4.02	104,000
	Measured+Indicated	844,000	4.03	109,000
	Inferred	1,244,000	6.33	253,000

1. Cut-off grades are based on a gold price of US\$1,600 per ounce, a foreign exchange rate of US\$0.76 for CA\$, a gold recovery of 93%
2. Pit constrained mineral resources are reported at a cut-off grade of 0.9 g/t Au within a conceptual pit shell
3. Underground mineral resources are reported at a cut-off grade of 3.0 g/t Au within reasonably mineable volumes

The Company is in possession of all mining permits required to commence the initial mining phase, known as the "Rolling Start", which allows the company to mine up to 550 tonnes per day.
