In this investor webinar, NEO Battery Materials will provide two-part updates on the Company’s corporate and technical developments. With an overview of the Company and material progress, management and the engineering team will highlight:

i)	Discussion on commercialization pathways, future collaboration with EV battery supply chain players & strategic growth direction
ii)	Technical improvements on the optimized silicon anode materials, NBMSiDE™
iii)	South Korean Commercial Plant: Overview of Greenfield Site & Construction Progress
iv)	R&D Scale-Up Centre: Before & After Construction/Procurement, Overview of Engineering Team's Activities for NBMSiDE™ Iterative Manufacturing & Optimization

About NEO Battery Materials Ltd.

NEO Battery Materials Ltd. is a Vancouver-based company focused on electric vehicle lithium-ion battery materials. NEO has a focus on producing silicon anode materials through its proprietary single-step nanocoating process, which provides improvements in capacity and efficiency over lithium-ion batteries using graphite in their anode materials. The Company intends to become a silicon anode active materials supplier to the electric vehicle industry. For more information, please visit the Company's website at: <https://www.neobatterymaterials.com/>.
