Neo Performance Materials Inc. ("Neo", the "Company") (TSX: NEO) released its second quarter 2021 financial results. The financial statements and management's discussion and analysis ("MD&A") of these results can be viewed on Neo's web site at <a href="www.neomaterials.com">www.neomaterials.com</a> and on SEDAR at <a href="www.sedar.com">www.sedar.com</a>.

## HIGHLIGHTS OF Q2 2021 CONSOLIDATED PERFORMANCE

For the three months ended June 30, 2021, consolidated revenue was \$135.1 million compared to \$67.7 million in the second quarter of 2020; an increase of \$67.4 million or 99.5%. Neo

reported a net income of \$13.0 million, or \$0.34 per share. Adjusted Net Income<sup>(1)</sup> totaled \$14.1 million, or \$0.37 per share. Adjusted EBITDA<sup>(1)</sup> was \$22.2 million, an increase of \$21.0 million over the comparable prior-year period.

As of June 30, 2021, Neo had cash and cash equivalents of \$59.6 million plus restricted cash of \$4.2 million, compared to \$72.2 million plus \$4.2 million as at December 31, 2020. In the six months ended June 30, 2021, Neo paid \$6.2 million in dividends to its shareholders, remitted \$3.0 million related to withholding taxes on stock-based awards and received \$1.5 million from stock options exercised. In addition, Neo has approximately \$6.5 million available under its credit facilities with \$4.4 million drawn as at June 30, 2021, compared to \$2.4 million drawn as at December 31, 2020.

(1) Neo reports non-IFRS measures such as "Adjusted Net Income", "Adjusted Earnings per Share", "Adjusted EBITDA", "Adjusted EBITDA Margin" and "EBITDA". Please see information on this and other non-IFRS measures in the "Non-IFRS Measures" section of this new release and in the MD&A, available on Neo's website at <a href="https://www.neomaterials.com">www.neomaterials.com</a> and on SEDAR at <a href="https://www.sedar.com">www.sedar.com</a>.

"We had an outstanding second quarter that exceeded our expectations, with record revenue and robust profitability, while our plants operated at near-record output," said Constantine Karayannopoulos, Neo's CEO. "Dialogue with existing and new customers on product innovation remained very active as we continue to collaborate on next generation products. We are continuing to diversify our sources of rare earth feed materials to include material sourced from North America for our European-based rare earth processing facility in Sillamäe, Estonia, which will strengthen our ability to meet

growing demand from our global customers. Our R&D pipelines are full and the outstanding customer service provided by our global teams is helping us win new business. With the organic growth we are seeing across all business units, the significant macro tailwinds boosting the entire rare earths sector, and a number of strategic growth opportunities on the radar screen, we remain confident in the sustainability of our long term vision and growth strategy."

For the three and six months ended June 30, 2021, revenues were 99.5% and 67.9% higher, respectively, than the corresponding periods of 2020. All three segments experienced an increase in revenues due to higher pricing and volumes. Aside from this lower comparable period, all three segments demonstrated strong growth in volumes and profitability compared to recent (non-COVID-19) historical periods.

Neo reported operating income of \$18.2 million and net income of \$13.0 million for the three months ended June 30, 2021; and operating income of \$34.6 million and net income of \$20.6 million for the six months ended June 30, 2021. Operating income in the three and six months ended June 30, 2021 was higher in Operationally, all segments reported all three segments. significant increases in volume, revenue and earnings. Magneguench saw broad volume increases across the majority of its applications including key end markets such as solutions for electrified vehicles (including traction motors) and in other applications such as factory automation and home appliances. C&O saw continued strong demand particularly for its magneticbased rare earth elements, growth in environmental catalysts exceeding market growth rates and record sales volumes in its environmentally protective water treatment solutions. The Rare Metals segment saw some recovery in the aerospace end market and made key progress to extended its sales into additional, nonaerospace markets.

Adjusted EBITDA for the three and six months ended June 30, 2021 was \$22.2 million and \$44.6 million, respectively, an increase of \$21.0 million and \$33.8 million compared to the same periods of the prior year. Similar to operating income, in the three and six months ended June 30, 2021, Adjusted EBITDA in all three segments increased over the same periods in the prior year.

For the six months ended June 30, 2021, revenue in the Magnequench segment was \$132.8 million, compared to \$68.8 million in the six months ended June 30, 2020; an increase of \$64.0 million or 93.0%. Volume increased to 1,509 tonnes compared to 1,024 tonnes in the three months ended June 30, 2020. For the six months ended June 30, 2021,

volume increased to 3,234 tonnes, compared to 2,295 tonnes in the same period in 2020; an increase of 40.9%.

Operating income for the three and six months ended June 30, 2021 was \$12.6 million and \$23.7 million, respectively, an increase of \$9.2 million and \$14.7 million when compared to the three and six months ended June 30, 2020.

For the three and six months ended June 30, 2021, volumes in the Magnequench segment saw a continued rebound and strong growth compared to prior periods. For the three months ended June 30, 2021, Adjusted EBITDA in the Magnequench segment was \$14.9 million, compared to \$5.6 million in the three months ended June 30, 2020; an increase of \$9.4 million. For the six months ended June 30, 2021, Adjusted EBITDA in the Magnequench segment was \$28.4 million, compared to \$13.3 million in same period of 2020; an increase of \$15.1 million.

#### **NON-IFRS MEASURES**

This news release refers to certain non-IFRS financial measures such as "Adjusted Net Income", "EBITDA", "Adjusted EBITDA", and "Adjusted EBITDA Margin". These measures are not recognized measures under IFRS, do not have a standardized meaning prescribed by IFRS, and may not be comparable to similar measures presented by other companies. Rather, these measures are provided as additional information to complement IFRS financial measures by providing further understanding of Neo's results of operations from management's perspective. Neo's definitions of non-IFRS measures used in this news release may

not be the same as the definitions for such measures used by other companies in their reporting. Non-IFRS measures have limitations as analytical tools and should not be considered in isolation nor as a substitute for analysis of Neo's financial information reported under IFRS. Neo uses non-IFRS financial measures to provide investors with supplemental measures of its base-line operating performance and to eliminate items that have less bearing on operating performance or operating conditions and thus highlight trends in its core business that may not otherwise be apparent when relying solely on IFRS financial measures. Neo believes that securities analysts, investors and other interested parties frequently use non-IFRS financial measures in the evaluation of issuers. Neo's management also uses non-IFRS financial measures in order to facilitate operating performance comparisons from period to period. For definitions of how Neo defines such financial measures, please see the "Non-IFRS Financial Measures" section of Neo's management's discussion and analysis filing for the three and six months ended June 30, 2021, available on Neo's web site at www.neomaterials.com and on SEDAR at www.sedar.com.

# Notes:

(1)	Represents other expenses resulting from non-operational related activities, including provisions for estimated damages for outstanding legal claims related to historic volumes. These costs and recoveries are not indicative of Neo's ongoing activities.
(2)	Represents unrealized and realized foreign exchange losses (gains) that include non-cash adjustments in translating foreign denominated monetary assets and liabilities.

Represents share and value-based compensation expense in respect of the Legacy Plan, the LTIP and the long-term value bonus plan, which has similar vesting criteria to the share-based plan and is settled in cash for non-executives and non-North Americans where implementation of a share settlement plan would have been prohibitively expensive in terms of administration and compliance. Value-based compensation is included in selling, general, and administration expenses. For the three and six months ended June 30, 2021, value-based compensation expense was nil, as the financial statement impact of the liquidity event was recorded in the year ended December 31, 2020. For the three and six months ended June 30, 2020, value-based compensation recovery was \$(320) and \$(213), respectively. Neo has removed both the share and value-based compensation expense from EBITDA to provide comparability with historic periods and to treat it consistently with the share-based awards that they are intended to replace.

(3)

The negative economic impacts of COVID-19 were determined to be an impairment indicator as of June 30, 2020 for all Neo's CGUs. In accordance with IAS 36 Impairment of Assets, the recoverable amount of Neo's CGUs was determined based on fair value less cost of disposal for the Magnequench segment and value in use for the C&O and the Rare Metals segments. As a result of the impairment test, Neo recognized an impairment charge of \$59.1 million for the six months ended June 30, 2020, with \$35.1 million attributable to the C&O segment and \$24.0 million attributable to the Rare Metals segment. No impairment was recorded against the Magnequench segment.

Represents unrealized and realized foreign exchange losses
(1) (gains) that include non-cash adjustments in translating foreign denominated monetary assets and liabilities.

The negative economic impacts of COVID-19 were determined to be an impairment indicator as of June 30, 2020 for all Neo's CGUs. In accordance with IAS 36 Impairment of Assets, the recoverable amount of Neo's CGUs was determined based on fair value less cost of disposal for the Magnequench segment and value in use for the C&O and the Rare Metals segments. As a result of the impairment test, Neo recognized an impairment charge of \$59.1 million for the six months ended June 30, 2020, with \$35.1 million attributable to the C&O segment and \$24.0 million attributable to the Rare Metals segment. No impairment was recorded against the Magnequench segment.

Represents share and value-based compensation expense in respect of the Legacy Plan, the LTIP and the long-term value bonus plan, which has similar vesting criteria to the share-based plan and is settled in cash for non-executives and non-North Americans where implementation of a share settlement plan would have been prohibitively expensive in terms of administration and compliance. Value-based compensation is included in selling, general, and administration expenses. For the three and six months ended June 30, 2021, value-based compensation expense was nil, as the financial statement impact of the liquidity event was recorded in the year ended December 31, 2020. three and six months ended June 30, 2020, value-based compensation recovery was \$(320) and \$(213), respectively. Neo has removed both the share and value-based compensation expense from net income to provide comparability with historic periods and to treat it consistently with the share-based awards that they are intended to replace.
