

Siyata Mobile Launches Uniden® Link 4G Cradle Style Cellular Signal Booster

written by Raj Shah | October 1, 2018

✖ October 1, 2018 ([Source](#)) – Siyata Mobile Inc. (the “Company” or “Siyata”) (TSX-V:SIM / OTCQX:SYATF) is pleased to announce the launch of its Uniden® Link 4G Cradle Style Cellular Signal Booster (“Uniden® Link”) and will be available at Costco.ca in addition to the existing portfolio of Uniden Cellular Boosters.

Designed specifically for the everyday driver who drops calls or loses cellular signal while commuting, the Uniden® Link is an affordable, extremely easy solution that complies with hands-free driving regulations.

The Uniden® Link 4G offers up to 50x more signal with clearer voice calls and lightning fast data speed, with an extremely easy plug and play installation. The Uniden® Link 4G secures any cellular device to the cradle with a built in, extra strong magnet mount, high speed charging port, and works on all cellular operated networks (2G, 3G, 4G/LTE).

Uniden® continues to solve cellular coverage issues with dropped calls being an ongoing problem for in-vehicle cellular users. The cradle is powered through a lighter plug power cable while an outdoor antenna receives and sends cellular voice and data signals between the operator’s tower and the signal booster, offering improved cellular coverage and optimal sound quality.

Marc Seelenfreund, CEO and Chairman of Siyata Mobile, stated, “We are very pleased to bring another innovative product to the market with strong distribution already in place. We have had

great success with the Uniden cellular booster portfolio for many years now and we view this as another strong addition to our portfolio with strong distribution in place. This is an additional revenue stream for the company with a very large addressable market and we look forward to a highly successful roll out.”

About Siyata

A TSX Venture Top 50 Company, Siyata Mobile Inc. is a leading global developer and provider of cellular communications systems for enterprise customers, specializing in connected vehicle products for professional fleets, marketed under the Uniden® Cellular brand. Since developing the world’s first 3G connected vehicle device, Siyata has been a pioneer in the industry, launching the world’s first 4G LTE all-in-one fleet communications device in 2017. Incorporating voice, push-to-talk over cellular, data, and fleet management solutions into a single device, the company aims to become the connected vehicle communications device of choice for commercial vehicles and fleets around the world.

Siyata also offers rugged phones for industrial users and signal boosters for homes, buildings, and fleets with poor cell coverage. Siyata’s customers include cellular operators, commercial vehicle technology distributors, and fleets of all sizes in Canada, the U.S., Europe, Australia, and the Middle East.
