ZEN Graphene Solutions Finalizes Definitive Commercial Agreement with Trebor Rx

written by Raj Shah | September 28, 2021

September 27, 2021 (Source) – **ZEN Graphene Solutions Ltd.** (“**ZEN**” or the “**Company**“) (TSXV:ZEN)(OTC PINK:ZENYF), a Canadian, nanotechnology company focused on next-gen healthcare solutions, announces that it has signed a definitive commercial agreement with Trebor Rx (Trebor) for the manufacturing of **ZEN**Guard™-enhanced personal protective equipment. The agreement includes surgical masks, filters for Trebor’s patent pending Pro+ mask, nitrile gloves and other potential products.

Greg Fenton CEO commented: ”After working closely with George Irwin and the Trebor team over the last year, we have developed an excellent working relationship and are eager to launch our first product together, the Trebor Rx surgical mask with **ZEN**Guard™ technology delivering over 99.99% bacterial and viral filtration efficiency. This is a significant commercial success for both our organizations, but more importantly, it brings a new option to healthcare employees and others in higher risk settings that wish to significantly enhance the bacterial and viral filtration efficiency compared to a typical, disposable ASTM level 3 mask.”

”Trebor and Zen have worked hard to bring a game changing mask to market. The enhanced protection in our mask is just the beginning of an extensive line of anti-microbial protective equipment designed to keep front line healthcare workers safer. The Trebor/Zen relationship is an example of two Canadian

companies working together to develop, produce, market and sell world class product on the world stage. We are excited to be part of this journey with Greg Fenton, Francis Dube and the Zen group. ” commented George Irwin of Trebor Rx.

About ZEN Graphene Solutions Ltd.

ZEN is a nanotechnology company developing and commercializing next-gen healthcare solutions in the areas of prevention, detection, and treatment. ZEN is currently focused on commercializing **ZEN**Guard™, a patent pending coating with 99% antimicrobial activity, including against COVID-19, and the potential to use similar compounds as pharmaceutical products against infectious diseases. The company also has an exclusive agreement to be the global commercializing partner for a newly developed, aptamer-based rapid pathogen detection technology.

About TreborRx Ltd.

TreborRx is a Canadian success story that began when the first wave of COVID hit our country in the winter of 2020. Trebor President Brenda Elliott and CEO George Irwin – who are life partners as well as business partners – used their extensive experience in the toy manufacturing sector to pivot and very quickly address critical shortages PPE facing Canadian healthcare workers. In 18 short months, Trebor built a state-of-the art manufacturing facility in Collingwood Ontario and has been highly active in the research and development of superior PPE solutions. Trebor also operates an Alberta PPE manufacturing facility and is entering the international marketplace with Canadian made innovations and products.
