

# Nano One Receives \$845,625 from Early Warrant Exercise Incentive Program

August 28, 2019 ([Source](#)) – Nano One Materials Corp. (TSXV: NNO) (OTC Pink: NNOMF) (FSE: LBMB) (“Nano One” or the “Company”) is pleased to announce that, further to its press release dated July 31, 2019, it has received gross proceeds of \$845,625 from the exercise of 676,500 share purchase warrants at \$1.25 per share pursuant to its early warrant exercise incentive program (the “Program”).

As an incentive for the early exercise of their share purchase warrants, warrant holders received an additional 676,500 new share purchase warrants (each an “Incentive Warrant”). Each Incentive Warrant entitles the holder to purchase one common share of the Company for a period of 14 months from the date of issuance of such Incentive Warrant, at a price of \$1.60. The Incentive Warrants are subject to a four month hold period from the date of issuance.

The Incentive Warrants are also subject to an accelerated expiry if the volume weighted average price of the common shares is greater than or equal to \$2.00 for any 10 consecutive trading days and, if the Company has given notice, the Incentive Warrants will expire 30 days following the date of such notice.

The balance of the 1,054,490 warrants not exercised under the Program will remain outstanding and continue to be exercisable for common shares of the Company on their current terms, with an expiry date of September 8, 2019.

Mr. Dan Blondal, CEO of Nano One, said, *“We are pleased with shareholder support and with the positive outcome of this incentive program. This strengthens our cash position, leverages non-dilutive government funding and demonstrates investor confidence in the execution of Nano One’s business plans.”*

### **About Nano One**

Nano One Materials Corp (“Nano One” or “the Company”) has developed patented technology for the low-cost production of high performance lithium ion battery cathode materials used in electric vehicles, energy storage and consumer electronics. The processing technology enables lower cost feedstocks, simplifies production and advances performance for a wide range of cathode materials. Nano One has built a demonstration pilot plant and is partnering with global leaders in the lithium ion battery supply chain, to advance its NMC, LFP and LMN cathode technologies for large growth opportunities in e-mobility and renewable energy storage applications.

Nano One’s pilot and partnership activities are being funded with the assistance and support of the Government of Canada through Sustainable Development Technology Canada (SDTC) and the Automotive Supplier Innovation Program (ASIP) a program of Innovation, Science and Economic Development Canada (ISED). Nano One also receives financial support from the National Research Council of Canada Industrial Research Assistance Program (NRC-IRAP). Nano One’s mission is to establish its patented technology as a leading platform for the global production of a new generation of battery materials. [www.nanoone.ca](http://www.nanoone.ca)
