Seair Inc. (TSX VENTURE:SDS) (the “Company”) is pleased to announce it has partnered with Ledcor Environmental Solutions in solving a difficult oil sludge waste issue in the oil patch. The joint trial will demonstrate the ability to separate high levels of solids and recover valuable oil from waste water. The equipment will be delivered and trialed in December/January.

“We are very excited to work with Ledcor and demonstrate our diffusion technology for this difficult and widespread application. Together we will demonstrate the first viable solution to this problem and jointly expand upon its success. This is the first of many joint projects we look forward to with Ledcor, for this and other applications.” said Jeff Seibert, Seair CEO.

“Ledcor is very pleased to be working with Seair as we investigate new and innovative technologies for application in the Canadian Oil Sands” said Scott Lyons, President Ledcor Environmental Solutions. “The ability to recover valuable resources from waste products and reduce the overall impact of industrial processes on the environment is a key focus for Ledcor.”

About Seair Inc.

Seair Inc. is a Calgary based cleantech company. Seair has commercialized proprietary technology that can diffuse gases, such as oxygen, ozone and carbon dioxide, into liquids more effectively and with lower power consumption than the competition. Seair's patented technologies can produce micron size bubbles that are more efficient than other diffusion technologies because the diffused gases remain in solution for extended periods of time, leading to increased productivity and lower operating costs. Seair has been working with customers in the Oil and Gas industry for over five years. Seair applications include oil sands SAGD water solutions, frac and produced water treatment, industrial ponds treatment, mine dewatering/treatment, end-to-end sewage treatment for permanent residential communities and remote work camps, golf course irrigation and pond treatment and most recently, industrial emissions treatment. Parties interested in obtaining further information or receiving news releases and corporate documents from Seair may email such requests to info@seairinc.com or visit the Seair website at www.seairinc.com.

Statement Regarding Forward-Looking Information

This news release of Seair contains statements that constitute "forward-looking statements." Such forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause Seair's actual results, performance or achievements, or developments in the industry to differ materially from the anticipated results, performance or achievements expressed or implied by such forward-looking statements. Forward looking statements are statements that are not historical facts and are generally, but not always, identified by the words "expects," "plans," "anticipates," "believes," "intends," "estimates," "projects," "potential" and similar expressions, or that events or conditions "will," "would," "may," "could" or "should" occur. Forward-looking statements in this document include statements regarding

Seair's expectations regarding the regulatory approval of the Private Placement and closing of the Private Placement. There can be no assurance that such statements will prove to be accurate. Actual results and future events could differ materially from those anticipated in such statements, and readers are cautioned not to place undue reliance on these forward-looking statements. Any factor could cause actual results to differ materially from Seair's expectations. Seair undertakes no obligation to update these forward-looking statements in the event that management's beliefs, estimates or opinions, or other factors, should change.

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.
