

Drolet Stock Notes on Beauce Gold Fields: Looking for the Gold Source in the Heart of the First Canadian Gold Rush

Mario Drolet, President of MI3 Communications Financières Inc. (MI3), released his Drolet Stock Notes on Beauce Gold Fields Inc. (TSXV: BGF) on February 22, 2021, for exclusive distribution on InvestorIntel. Highlights include:

- Beauce Gold Fields is a gold exploration company focused on placer to hard rock exploration in the Beauce region of Southern Quebec, Canada.
- Exploration by BGF discovered a major fault line as the probable source of the placer gold channel.
- Tight capital structure with 37.8M shares outstanding
- BGF recently rebound and trending higher ...
- Support: S2; \$0.14 S1; \$0.17 Resistance: R1; \$0.19 R2; \$0.21

About Beauce Gold Fields

Beauce Gold Fields is a gold exploration company focused on placer to hard rock exploration in the Beauce region of Southern Quebec. The Company's flagship property is the St-Simon-les-Mines Gold project site of Canada's first gold rush that pre-dates the Yukon Klondike. The Beauce region hosted some of the largest historical placer gold mines in Eastern North America that were active from 1860s to the 1960s. It produced the largest gold nuggets in Canadian mining history (50oz to 71oz). The intent of Beauce Gold Fields is to trace the workings back to the bedrock source and uncover economic gold mineralization.

Comprising 152 contiguous claims and 7 real estate lots, the project area contains a six-kilometer long placer channel consisting of an unconsolidated gold-bearing auriferous units of a lower saprolite and an upper brown diamictite. The Company has calculated a theoretical Gold Exploration Target for the entire historical placer channel ranges between **61,000 ounces** (2,200,000 m³ @ 0.87g Au/m³) and **366,000 ounces*** (2,200,000 m³ @ 5.22 g Au/m³).

MI3 Market Alert: Will the city of La Beauce in Quebec be the theater of the next Gold rush in Canada?

Mario Drolet President of MI3 Communications Financières Inc. (MI3) released a technical note at market open today on Beauce Gold Fields Inc. (TSXV: BGF) for exclusive distribution on InvestorIntel. In this note, MI3 highlighted the following points on Beauce Gold Fields Inc.

- BGF is dedicated to the exploring for the bedrock source located in the Beauce's famous historical placer Gold

deposits located in the municipality of St-Simon les Mines in the Beauce region of Southern Quebec.

- The property also hosts numerous historical placer gold mines that were active from 1860s to the 1960s. However, economic interest by past mining companies were exclusively focused on the gold placers, therefore limited effort has been allocated to the exploration for a hardrock source of the placers.
- The recent discoveries of gold in saprolite indicating a close proximity to a bedrock source of gold, along with the recent discovery of a fault underneath the historical gold placers, provide possible further exploration discoveries.
- Brand new listing, Consolidating around ...10-.15 cents ...
- Support: S2; \$0.09 – S1; \$0.11 Resistance: R1; \$0.135 – R2; \$0.18

About Beauce Gold Fields

Beauce Gold Fields is a gold exploration company focused on

placer to hard rock exploration in the Beauce region of Southern Quebec. The Company's flagship property is the St-Simon-les-Mines Gold project, a unique, historically significant gold property located in the municipality of Saint-Simon-les-Mines. Comprising of a block of 152 claims as well as 7 real estate lots, the project area hosts a six kilometre long unconsolidated gold-bearing sedimentary unit (a lower saprolite and an upper brown diamictite). Textural observations (angularity) of gold nuggets suggest a relatively proximal source and therefore a short transport distance. The gold in saprolite indicates a close proximity to a bedrock source of gold, providing possible further exploration discoveries. The property was host to Canada's first gold rush before the one in the Yukon Klondike. It hosts some of the largest historical placer gold mines in Eastern North America that were active from 1860s to the 1960s.
