- BGF recently rebound and trending higher ...
- Support: S2; \$0.14 S1; \$0.17 Resistance: R1; \$0.19 R2; \$0.21

About Beauce Gold Fields

Beauce Gold Fields is a gold exploration company focused on placer to hard rock exploration in the Beauce region of Southern Quebec. The Company's flagship property is the St-Simon-les-Mines Gold project site of Canada's first gold rush that pre-dates the Yukon Klondike. The Beauce region hosted some of the largest historical placer gold mines in Eastern North America that were active from 1860s to the 1960s. It produced the largest gold nuggets in Canadian mining history (50oz to 71oz). The intent of Beauce Gold Fields is to trace the workings back to the bedrock source and uncover economic gold mineralization.

Comprising 152 contiguous claims and 7 real estate lots, the project area contains a six-kilometer long placer channel consisting of an unconsolidated gold-bearing auriferous units of a lower saprolite and an upper brown diamictite. The Company has calculated a theoretical Gold Exploration Target for the entire historical placer channel ranges between **61,000 ounces** (2,200,000 m³ @ 0.87g Au/m³) and **366,000 ounces*** (2,200,000 m³ @ 5.22 g Au/m³).
