

# **Peter Clausi on how CBLT has used creative M&As in gold and battery metals to make money for their shareholders**

In a recent InvestorIntel interview, Tracy Weslosky asks Peter Clausi, President, CEO and Director of CBLT Inc. (TSXV: CBLT) to explain what he meant by his line that “a mining company can make more money with a pen than with a drill bit.” He responds on how this works with market cycles and then adds that as a result of their focus on strategic M&A activities that “CBLT has not had to do financing since 2016.” He then goes on to explain how CBLT has found creative M&As to make money for their shareholders.

In this InvestorIntel interview, which may also be viewed on YouTube (click here to subscribe to the InvestorIntel Channel), Peter went on to say, “Two years ago, CBLT bought a portfolio of assets for little over \$1 million in stock. Northshore gold was one of the assets in the portfolio which was sold for \$1.45 million.” He also provided an update on the Big Duck Lake gold property on which Peter said “...is analogous to the Moose Lake Porphyry which hosts the Hemlo Gold Camp.” Commenting on the cobalt market Peter said, “If you believe that we are going to greenify the world, if you believe that there is a run on Lithium – then you have to believe that there is a run on cobalt.”

## **GTA Resources' Peter Clausi on hitting 'bonanza' grade gold at Big Duck Lake**

March 16, 2018 – “The drill results were very strong. We put down 4 holes and all 4 holes hit the gold zone at what is called The Coco-Estelle showing. We proved up the historic mineralization there. One of the holes returned bonanza grade gold. I know it is not a precise term, but that is what we call it. 823 grams over half a meter and 44 meters of 1.6 grams of gold is a pretty good hole.” states Peter Clausi, CEO, President and Director of GTA Resources and Mining Inc. (TSXV: GTA), in an interview with InvestorIntel's Andy Gaudry.

**Andy Gaudry:** We would like an update of Big Duck Lake.

**Peter Clausi:** Within GTA.

**Andy Gaudry:** Yes.

**Peter Clausi:** Big Duck Lake is in Hemlo, 25 kilometers north of our other project in Hemlo called Northshore. At Northshore we have about 1.2 million ounces of indicated plus inferred of gold. Big Duck Lake is right next door to the former producing Winston Lake Mine. It is a polymetallic area. Our technical

team thinks we are on the same geologic setting as the former producing mine. We purchased the property and drilled it. Drill results came out in January.

**Andy Gaudry:** That is wonderful. How were those results and how does that affect GTA moving forward?

**Peter Clausi:** The drill results were very strong. We put down 4 holes and all 4 holes hit the gold zone at what is called The Coco-Estelle showing. We proved up the historic mineralization there. One of the holes returned bonanza grade gold. I know it is not a precise term, but that is what we call it. 823 grams over half a meter and 44 meters of 1.6 grams of gold is a pretty good hole.

**Andy Gaudry:** Wonderful.

**Peter Clausi:** We are happy with it. We will raise some more money, go back in the field. We will drill again and create more value for shareholders.

**Andy Gaudry:** That is wonderful. Back to shareholders, what can they expect for the next quarter or two from GTA?

**Peter Clausi:** We are doing engineering work on the million ounces at Northshore. We are looking at environmental and how do you put that into production. At the same time we will be considering our next round of drilling at Big Duck Lake...to access the complete interview, [click here](#)

# GTA Resources CEO on hitting the gold zone

“Gold was returned in every hole...all 4 holes hit the gold zone and it is strongly encouraging numbers...” – states Peter Clausi, CEO, President and Director of GTA Resources and Mining Inc. (TSXV: GTA) in an interview with InvestorIntel’s Kelly Bird.

**Kelly Bird:** What’s next for the Big Duck Lake property?

**Peter Clausi:** One of the samples ran over detection limits. That is back in the lab so we can ascertain the exact gold value out of that one sample. Then our technical team will compile all of the data. We will probably be back, I would guess, into May or June for a follow up program. Not drilling right away, but to do more surface work, possibly some IP, maybe a mag survey, but we will probably be drilling there in late summer/early fall.

**Kelly Bird:** Why should shareholders be investing in GTA right now?

**Peter Clausi:** A recent report was put out by one of the research firms that looked at proven ounces in the ground versus market capitalization their conclusion was GTA Resources was the cheapest stock on the stock exchange with that ratio because we have proven ounces at Northshore and the price of the stock had drifted. It is, in our opinion, it is an undervalued gold company with proven gold in the ground and a highly prospective other property in Hemlo...to access the complete interview, [click here](#)

# **Clausi on the Existing Shareholder Exemption financing model**

Peter M. Claudi, CEO of GTA Resources and Mining Inc. (TSXV: GTA) ("GTA") in an interview with InvestorIntel Senior Editor Jeff Wareham discusses GTA's Northshore property with its >1 million ounces of gold, its Big Duck Lake gold project and underlying financing. Big Duck Lake has 46 documented gold showings and part of the property has an "...historic estimate of 53,000 tons, with more than 10 grams of gold per ton." GTA is one of the first companies in Canada to use a crowdfunding prospectus exemption called the Existing Shareholder Exemption, with the use of proceeds going towards exploration at Big Duck Lake. Peter explains how if you are an existing shareholder you have a built-in exemption, making this a "very equitable financing option" – for information on how this works, visit GTA's website by clicking [here](#)...to access the complete interview, click [here](#)
