

Fission Uranium's Ross McElroy on the start of a uranium bull market

written by InvestorIntel | July 30, 2020

"We are at the start of a bull market right now. That has happened because there is so much production shutdowns globally. All the major mines, even all the production in Canada has been shutdown. We know the demand is there and it continues to grow, supply is constricting and these are the things that are making the bottom of the bull market happen. I think we are actually in it. It hasn't been reflected yet in the price of the commodity, but it is coming and we think our share price will follow the price of the commodity upwards." States Ross McElroy, President, COO and Chief Geologist of [Fission Uranium Corp.](#) (TSX: FCU | OTCQX: FCUUF), in an interview with InvestorIntel's Tracy Weslosky.

Ross went on to say that Fission Uranium is well financed and stated that 2020-2021 will be significant years for the company as it advances its uranium project. Ross also commented on Fission's strong management team which has a great success record. The team has made two major discoveries, the most significant of which is the Triple R deposit on the company's PLS property in Canada's Athabasca Basin. The Triple R deposit is a world leading high-grade uranium deposit.
