

InvestorIntel Interview with Dan Blondal of Nano One Materials Corp.

Dan Blondal, CEO, Director and Founder of Nano One Materials Corp. (TSXV: NNO) in an InvestorIntel interview, discuss their scalable industrial process for producing low cost high performance battery materials and a wide range of other advanced nanostructured composites. Two of their patent products are Nano One Materials' cobalt free 5 volt battery, created using nickel and manganese and their production technology in manufacturing cathodes, which decreases the cost of batteries by 50% and increases energy storage capabilities. Dan also touches upon what shareholders should expect in the next few quarters...to access the complete interview, [click here](#)
