

Pieter Bakker of Vatic Ventures Provides Insights on its Gold & Critical Minerals Projects in Canada

written by InvestorNews | June 9, 2023

In this InvestorIntel interview, Tracy Weslosky talks with [Vatic Ventures Corp.](#)'s (TSXV: VCV | OTCQB: VCVVF) CFO Pieter Bakker about Vatic's portfolio of gold and critical minerals projects in Canada. Pieter says that they are currently focused on their gold exploration property known as the Hansen prospect located in the Chibougamau area of northern Quebec but the company also has a critical minerals project in New Brunswick that includes copper, molybdenum, nickel, platinum group elements (PGE), rare earths (REE), tin, and tungsten.

The Hansen property is located in the northeast corner of the Matagami-Chibougamau Greenstone Belt and previous work delineated a mineralized zone 15 meters (m) wide over a strike length of 250m.

With an [I.P. geophysical survey](#) set to commence soon, followed by drilling on the Hansen Gold Project later on in the year, Pieter discusses that previous work on the project has shown exceptional gold values, including surface grab samples of 33.25 grams per tonne (g/t) gold (Au) and 34.92 g/t Au, and drill intersections of 12.8 g/t Au over 1.05m, 7.94 g/t Au over 1.05m, and 75.29 g/t Au over 0.3m.

He remarks that the Hansen prospect is located in "the most promising area for gold exploration", according to Quebec Geological Survey.
