About Newlox Gold Ventures Corp.

Newlox Gold Ventures Corp. is an environmental remediation company recovering contaminants and residual precious metals from historical waste left behind over more than a century of inefficient artisanal and small-scale mining in politically and socially stable jurisdictions in Latin America.

The Newlox environmentally and socially responsible business model has been deployed after extensive experience in the region and with the help of the Company's technical advisors at the Norman B. Keevil Institute of Mining Engineering at the University of British Columbia ("UBC") which, provides the Company with unique advantages, such as not having to undertake exploration work or mining, resulting in dramatically reduced overall costs.

Newlox also benefits from the high grades characteristic of artisanal mine tailings due to the inefficient processing techniques used by the original miners.
