

Don Allan on how Cielo transforms landfill garbage into high-grade renewable fuel

In a recent InvestorIntel interview, Peter Clausi spoke with Don Allan, President, CEO & Chairman of Cielo Waste Solutions Corp. (CSE: CMC | OTCQB: CWSFF) about Cielo's waste to renewable fuel technology that transforms landfill garbage into high-grade renewable fuel.

In this InvestorIntel interview, which may also be viewed on YouTube (click here to subscribe to the InvestorIntel Channel), Don went on to talk about the fast-growing recycling and renewable fuel industries. "Recycling industry is less than seven years old and is already 10,000 times larger than the oil and gas industry. And is going to double in size in the next 5-7 years," Don said.

Don explained how Cielo's technology changes how the world deals with landfills and highlighted the sustainability issues in using food crops to produce renewable fuels. Cielo combines a proprietary catalyst and heat to convert landfill garbage into renewable fuels at a very low cost.

About Cielo Waste Solutions Corp.

Cielo Waste Solutions Corp. is a publicly traded company with its shares listed to trade on the Canadian Securities Exchange ("CSE") under the symbol "CMC", the OTC Markets Group, on the OTCQB, under the symbol "CWSFF" and the Frankfurt Securities Exchange under the symbol WKN: C36. Cielo is a waste to renewable fuel company with a game changing technology

engineered to help solve the world's garbage crisis. Cielo's technology transforms landfill garbage into renewable high-grade diesel and kerosene (aviation jet and marine fuel). Cielo's proven and patented technology is currently being deployed in the Company's Aldersyde Facility, Alberta, where wood waste is currently being converted into renewable fuels.

Cielo is headquartered in Alberta, Canada with plans to build and operate green facilities across North America as well as globally.

Cielo is expanding its footprint by having Memorandums of Understanding in place with third parties pursuant to which facilities will be built, at no cost to Cielo, Joint Venture Renewable Diesel Facilities in Grande Prairie, Calgary, Medicine Hat and Lethbridge, Alberta as well as in Nova Scotia. Each JV Facility is projected to cost, depending on throughput approximately \$50 million to build, commission and place on production. Cielo will be the general contractor and operator of all the proposed JV Facilities. The feedstock that will be used in the Company's green facilities is the world's most available and inexpensive feedstock – garbage; including household, commercial/ construction/demolition garbage, used tires, railway ties and telephone poles as well as all types of plastic that currently cannot be recycled.
