

Power Nickel's Terry Lynch on "one of the hottest nickel holes in the last year anywhere in the world"

written by InvestorNews | January 23, 2023

In this InvestorIntel interview, Byron W King talks to [Power Nickel Inc.](#)'s (TSXV: PNP | OTCQB: CMETF) CEO Terry Lynch about the recent [drill results](#) from their Nisk Project near James Bay, Québec. Confirming the presence of high-grade nickel, copper, cobalt, PGE mineralization at the Nisk Project, Terry says that Power Nickel has reported "one of the hottest nickel holes in the last year anywhere in the world."

With a lot of operating mines in the region, Terry discusses how Power Nickel is advancing their Nisk Project towards commercialization. He goes on to provide an update on their recently closed [private placement](#). As a North American source of class 1 nickel, Terry discusses the growing nickel demand from the stainless steel and lithium-ion battery industries.

About Power Nickel Inc.

Power Nickel is a Canadian junior exploration company focusing on high-potential copper, gold, and battery metal prospects in Canada and Chile.

On February 1, 2021, Power Nickel (then called Chilean Metals)

completed the acquisition of its option to acquire up to 80% of the Nisk project from Critical Elements Lithium Corp. (CRE:TSXV)

The NISK property comprises a large land position (20 kilometers of strike length) with numerous high-grade intercepts. Power Nickel is focused on expanding its current high-grade nickel-copper PGE mineralization Ni 43-101 resource with a series of drill programs designed to test the initial Nisk discovery zone and to explore the land package for adjacent potential Nickel deposits.

Byron King and Terry Lynch discuss drivers for the nickel market, critical minerals and Power Nickel

written by InvestorNews | January 23, 2023

In this InvestorIntel interview, Byron W King talks to [Power Nickel Inc.](#)'s (TSXV: PNPB | OTCQB: CMETF) CEO Terry Lynch about the current nickel market. With an annual growth rate of 6%, Terry discusses how the stainless steel market continues to be the top driver for nickel demand.

As the metal of choice for lithium-ion batteries, Terry discusses how electrification will also have a huge impact on

nickel demand. With access to low-cost and low-carbon hydropower, Terry explains how Power Nickel's NISK Project in Québec is positioned to be one of the lowest cost and environmentally friendly sources of high-grade nickel in the world.

Search Minerals' Greg Andrews on the electrification of vehicles and the "push" for rare earth magnets

written by InvestorNews | January 23, 2023

In a recent InvestorIntel interview, Tracy Weslosky speaks with Greg Andrews, President, CEO, and Director of [Search Minerals Inc.](#) (TSXV: SMY), about the electrification of vehicles and their collaboration agreements with the Saskatchewan Research Council (SRC) and USA Rare Earth.

In this InvestorIntel interview, which may also be viewed on YouTube ([click here to subscribe to the InvestorIntel Channel](#)), Greg started, "The recent Canadian government's, the US government's, the EU government's rule on electrification and reducing internal combustion vehicles is a push in the right space for electrification which of course uses rare earth magnets." He continued by saying that in the last year the OEMs have been investing a lot of capital in electrification of vehicles which again requires a secure supply chain of rare earths to make their business plans operable.

"The collaboration agreements with both SRC and USA Rare Earth is a critical next step for us to turn our product into oxides." Greg said. He added that Search Minerals is exploring the proven Solvent Extraction Process with SRC and Continuous Ion Exchange process with USA Rare Earth to get their projects off the ground.

About Search Minerals Inc.

Led by a proven management team and board of directors, Search is focused on finding and developing Critical Rare Earths Elements (CREE), Zirconium (Zr) and Hafnium (Hf) resources within the emerging Port Hope Simpson – St. Lewis CREE District of South East Labrador. The Company controls a belt 63 km long and 2 km wide and is road accessible, on tidewater, and located within 3 local communities. Search has completed a preliminary economic assessment report for **FOXTROT**, and a resource estimate for **DEEP FOX**. Search is also working on three exploration prospects along the belt which include: **FOX MEADOW**, **SILVER FOX** and **AWESOME FOX**.

Search has continued to optimize our patented Direct Extraction Process technology with the generous support from the Department of Tourism, Culture, Industry and Innovation, Government of Newfoundland and Labrador, and from the Atlantic Canada Opportunity Agency. We have completed two pilot plant operations and produced highly purified mixed rare earth carbonate concentrate and mixed REO concentrate for separation and refining.
