

Fineqia's Bundeep Singh Rangar on the influence of digital currency in shaping the future of finance

written by InvestorNews | April 12, 2024

Fineqia International Inc. (CSE: FNQ | OTC: FNQQF | FSE: FNQA) continues to solidify its position as a leading player in the digital asset and fintech investment landscape with recent notable developments.

Investor.Coffee (04.02.2024): Economic Optimism is Rebounding Among Canadian Firms, Gold Prices Hit Another Milestone

written by InvestorNews | April 12, 2024

In today's "Morning Investor.Coffee," we start with some good news as it appears that the Canadian manufacturing sector is on the brink of reversing its prolonged downturn. March witnessed a positive change, with employment increasing and a reduction in the rate of decline in new orders, signaling potential sectoral revival. A pivotal move in the technology and financial sector

is the [acquisition](#) of Nuvei Corporation (Nasdaq: NVEI | TSX: NVEI) by Advent International in a deal valued at \$6.3 billion, spotlighting the company's significant value and the attractiveness of Canada's fintech landscape.

Economic optimism is rebounding among Canadian firms, a sentiment echoed by the Bank of Canada after almost two years of economic challenges. This shift has led traders to scale back their expectations of a rate cut in June. Moreover, Canada's First Nations are poised to significantly invest in energy projects, contingent on the federal government's promise to streamline the financing process for such ventures.

Market dynamics in the pre-opening phase are mixed. North American futures are on a downward trajectory, influenced by a decline in U.S. health insurers' shares. Conversely, European stocks are on the rise, with investors keenly awaiting German inflation data. In Asia, the landscape is varied; the Nikkei closed higher, while Chinese stocks remained relatively flat amid balancing acts between improved manufacturing data and anticipated stimulus measures. Notably, oil prices are experiencing an uptick, with Brent crude [advancing](#) past \$88 a barrel for the first time since October, largely due to increased tensions in the Middle East and threats to oil supply.

Gold prices have reached a new milestone, climbing to a record high of \$2,254.89, driven by momentum from investment funds. This surge reflects investors' growing appetite for safe-haven assets amidst a volatile market environment.

In the U.S., market sentiment is cautious as investors process the latest inflation data, with the Dow Jones Industrial Average dropping by 0.6% at the start of the quarter. The S&P 500 saw a slight decline of 0.2%, whereas the Nasdaq Composite edged up by 0.11%. The core PCE inflation data revealed a 2.8% increase on a

12-month basis in February, adding to the cautious outlook.

Significant corporate moves include BlackRock, State Street, and General Electric navigating through strategic shifts and regulatory scrutiny. General Electric's (NYSE: GE) completion of its breakup into three entities marks a historic reorganization aimed at revitalizing the company.

Globally, geopolitical tensions and strategic corporate actions continue to shape the economic landscape. Developments such as the Israeli airstrikes in Syria and Japan's stance on currency volatility highlight the ongoing complexities in international relations and financial markets. Today's edition provides a factual and data-driven overview of the current economic climate, reflecting on the resilience and strategic adaptations of businesses and markets worldwide.

Digital Asset ETPs Experience Growth Amid BTC Spot ETF Approvals

written by InvestorNews | April 12, 2024

In a notable start to 2024, the digital asset landscape witnessed a significant boost in investor confidence and market participation. [Fineqia International Inc.](#) (CSE: FNQ), a frontrunner in the digital asset and fintech investment sphere, has shed light on this positive trend through its meticulous [analysis](#) of global Exchange-Traded Products (ETPs) that incorporate digital assets as their underlying collateral.

According to Fineqia's research, January saw a 5% increase in total crypto Assets Under Management (AUM), climbing to \$52.0 billion from the previous \$49.5 billion.

This uptick in AUM is particularly striking given the backdrop of a 2.7% dip in the overall market value of crypto assets, which settled around \$1.73 trillion from \$1.77 trillion. The divergence between the AUM growth of crypto ETPs and the broader crypto market valuation can be largely attributed to the approval and commencement of trading of BTC Spot ETFs in the United States from January 11 onwards. These approvals have sparked a significant capital inflow into crypto ETPs, marking a pivotal moment for the industry.

The introduction of 10 BTC Spot ETFs by prominent issuers such as Blackrock, 21Shares, Grayscale, and more has been a catalyst for this growth. Notably, this includes nine new issuances and the transformation of the Grayscale Bitcoin Trust (GBTC) into an ETF. These newly issued products alone have attracted approximately \$6.9 billion in inflows in January, despite a net outflow from the Grayscale ETF, resulting in a net inflow exceeding \$1 billion for the month.

Among these, BlackRock's iShares Bitcoin Trust (IBIT) stands out, securing its position as one of the top five ETFs of 2024 based on inflows, with a remarkable \$3.2 billion amassed in just the first 17 days since its launch. The BTC ETFs have also been buoyed by Google's updated marketing policies, allowing for increased visibility through ads for "cryptocurrency coin trusts" in search results.

Fineqia CEO Bundeep Singh Rangar likened the approval of BTC Spot ETFs in the U.S. to a green light that has set the investor traffic in motion, with more participants gaining confidence in digital assets. The positive sentiment is reflected in the

performance of Bitcoin (BTC) itself, which saw a price increase of 2.5% to \$43,300 in January. Similarly, Ethereum (ETH) witnessed a 3.9% rise to \$2,365, showcasing the growing investor interest in leading cryptocurrencies.

Despite some segments experiencing a dip, such as ETPs representing a diversified basket of cryptocurrencies and those tracking an index of alternative coins, the overall growth narrative remains strong. The AUM of ETPs with BTC as the underlying asset, for instance, rose by 6.8% in January, underscoring the significant net inflow following the BTC Spot ETFs' approval.

Fineqia's analysis, drawing on reputable sources like 21Shares AG, Grayscale Investment LLC, VanEck Associates Corp., Morningstar, Inc., and TrackInSight SAS, highlights the robustness of the digital asset ETP market. With a portfolio encompassing the forefront of tokenization, blockchain technology, NFTs, AI, and fintech, Fineqia continues to be at the vanguard of supporting the next generation of the internet through its investments and research efforts. As the digital asset market evolves, the role of ETPs and the impact of regulatory approvals like those for BTC Spot ETFs in the U.S. will be crucial in shaping investor participation and confidence. The early indications from January 2024 suggest a promising year ahead for digital assets, as both new and seasoned investors navigate this dynamic and increasingly mainstream investment landscape.

Explosive Growth in Digital Asset-Based ETPs: Fineqia International Reports AUM Surge to \$50 Billion in 2023

written by Khadijah Samnani | April 12, 2024

Bitcoin's price witnesses a remarkable rise of 155% in 2023

[Fineqia International Inc.](#) (CSE: FNQ), a prominent player in digital assets and fintech investments, has released a [comprehensive analysis](#) of global Exchange Traded Products (ETPs) that are based on digital assets. This report highlights a significant growth in the Assets Under Management (AUM) of these products. In 2023, the AUM for digital asset-based Exchange Traded Funds (ETFs) and Notes (ETNs) surged by 2.5 times, reaching an impressive figure of nearly \$50 billion, up from \$20 billion.

The company's analysis revealed that the worldwide crypto ETPs' AUM grew at a rate of 19% over the value of the underlying digital assets, which increased by 123%. This disparity in growth rates is mainly attributed to Bitcoin's dominance in the ETP AUM, holding a 72% share, which is significantly larger than its 53% share in the overall digital asset market. Bitcoin's price witnessed a remarkable rise of 155% this year, which fueled investor interest in Bitcoin-denominated ETFs and ETNs.

Bundeep Singh Rangar, CEO of Fineqia, commented on this trend stating, "BTC was the sled dog pulling the (digital asset) ETF

sleigh this season.” He further added: “Investors believe they might even have sighted a Santa at the SEC.”

In the fourth quarter of 2023 alone, the AUM of ETPs with Bitcoin as the underlying asset experienced a substantial growth of 64%, rising to \$35.6 billion from \$21.7 billion. This growth was supported by Bitcoin’s price increase of 57% to \$42,300. Throughout the year, the AUM of ETPs holding Bitcoin escalated by 162%, outpacing the 155% rise in Bitcoin’s price.

The report also discusses the anticipation surrounding the SEC’s potential approval of spot Bitcoin ETFs by major issuers like Blackrock, Fidelity, Grayscale, and VanEck. The total AUM of ETPs holding digital assets grew by 62% in the fourth quarter to \$49.5 billion, surpassing the 53.8% rise in the market cap of all digital assets, which reached \$1.77 trillion. This indicates significant net inflows of investment capital, especially during the last quarter of 2023.

In December, the total crypto AUM increased by 14%, and the market value of crypto assets rose by 19%. Bitcoin’s price itself increased by 12.4%, while the AUMs rose by 11.8%.

The report also sheds light on Ethereum (ETH) and other cryptocurrencies. Ethereum’s value increased by 11.5% in December, and the AUM of ETH-denominated ETPs rose by 14.2%. Throughout 2023, the price of Ethereum rose by 90%, with a near equivalent increase in the AUM of ETH ETPs, suggesting neutral capital flows for these products.

ETPs representing a diversified basket of cryptocurrencies also showed significant growth, with a 23.9% increase in AUM during December and a 138% rise over 2023. The AUM for ETPs holding individual altcoins saw a 165% increase in 2023, indicating robust growth in this sector.

According to the [news release](#) issued earlier today, Fineqia's analysis includes data compiled from reputable sources such as 21Shares AG, Grayscale Investment LLC, VanEck Associates Corp., Morningstar, Inc., and TrackInSight SAS. The company, listed in Canada with offices in Vancouver and London, focuses on investments in early and growth stage technology companies, particularly those involved in tokenization, blockchain technology, NFTs, AI, and fintech. Fineqia is in the process of forming a VC fund, Glass Ventures, to back pioneering Web 4.0 companies.

Fineqia's Strategic Expansion and the Booming Digital Asset Market: Insights from CEO Bundeep Singh Rangar

written by InvestorNews | April 12, 2024

In a recent interview with Tracy Weslosky from InvestorNews, Bundeep Singh Rangar, CEO and Director of Fineqia International Inc. (CSE: FNQ), provided insights into the company's investment in Cripitonite, a Swiss digital asset management firm, and discussed the current state of the digital asset market. Concurrently, Fineqia released a news report highlighting significant growth in the digital asset sector.

Fineqia analysis reveals ‘notable surge’ in the global market of ETPs that are based on digital assets

written by InvestorNews | April 12, 2024

In a recent analysis by Fineqia International Inc. (CSE: FNQ), a prominent digital asset and fintech investment firm, there has been a notable surge in the global market of Exchange Traded Products (ETPs) that are based on digital assets. The year-to-date (YTD) data reveals an impressive 91% increase in the total Assets Under Management (AUM) of these products. This growth rate is particularly significant as it surpasses the expansion rate of the underlying digital assets by 30%.

Digital Asset-Based Exchange Traded Products AUM Surge

written by InvestorNews | April 12, 2024

Fineqia International Inc. (CSE: FNQ) (“Fineqia”), a prominent fintech and digital asset investment company, has recently highlighted a remarkable 51% growth in Assets Under Management (AUM) for global Exchange Traded Products (ETPs) backed by digital assets year-to-date (YTD). This surge saw crypto AUM rise by an impressive 63.5%, a rate that exceeded the growth of the underlying digital assets themselves, which saw an increase

of 31.5%.

Bundeeep Rangar on Fineqia's Asset Management Business Focused on Digital Currencies & Private Assets

written by InvestorNews | April 12, 2024

In this InvestorIntel interview, Chris Thompson talks with [Fineqia International Inc.](#)'s (CSE: FNQ) CEO, and Director Bundeeep Singh Rangar about [receiving approval](#) for its base prospectus in the European Economic Area to offer Exchange Traded Notes (ETNs) collateralized by digital assets. In addition to tracking price movements of its underlying digital assets, Bundeeep discusses how its ETNs will also generate yield for investors.

Bundeeep provides an update on their recently announced [partnership](#) with [FTSE Russell](#), a leading global index pricing provider. In addition to enhancing the transparency and liquidity of Fineqia's digital asset investment products, Bundeeep explains how the partnership with FTSE Russell lends credibility to Fineqia's integrity and helps them target institutional investors.

Sharing his confidence in the long-term adoption and growth of digital and alternative assets, Bundeeep provides [an update](#) on Fineqia's new venture capital fund, called Fineqia Glass Slipper

Ventures (FGSV), which will invest in innovative companies in the digital asset industry.

Bundeeep Singh Rangar of Fineqia Explains the Growth in Crypto ETPs

written by InvestorNews | April 12, 2024

In this InvestorIntel interview, Tracy Weslosky talks to [Fineqia](#)

[International Inc.](#)'s (CSE: FNQ) President, CEO, and Director Bundeep Singh Rangar about its [recent analysis](#) of the global Exchange Traded Products (ETPs) market. With the crypto market surpassing the US\$1 trillion mark, Bundeep discusses how ETPs' Assets Under Management (AUM) value increased by 39% during the month of January, faster than the rise in crypto prices, indicating that new money is flowing into these institutional-quality asset types.

As a financial product that includes exchange-traded funds (ETFs) and exchange-traded notes (ETNs) with cryptocurrencies as underlying assets, Bundeep explains ETPs make it easier for retail and institutional investors to access quality digital assets. He also comments that the recent rebound in the cryptocurrency market has provided a lift for the crypto ecosystems in various countries that are embracing digital currencies and crypto ETPs.

Bundeep Singh Rangar of Fineqia International talks about bringing innovation to the digital asset economy

written by InvestorNews | April 12, 2024

In this InvestorIntel interview, Tracy Weslosky talks to [Fineqia International Inc.](#)'s (CSE: FNQ) CEO and Director Bundeep Singh Rangar about how Fineqia is bringing innovation to the emerging digital asset economy. As a publicly listed and regulated company, Bundeep explains how Fineqia provides investors with exposure to digital assets such as cryptocurrencies, NFTs, Exchange Traded Products and blockchain through its growing portfolio of fintech and technology companies.

Bundeep also discusses how digital assets can not only provide exposure to price appreciation of cryptocurrencies but also generate yield along the way. Speaking about the expectation of significant revenue growth in music in the coming years, Bundeep discusses music NFTs which provide part ownership of a music track and also have an income generating component in the form of royalty streams. Bundeep also tells Tracy about the increased investor interest in their recently closed [private placement](#).
