

Mitchell Smith on the battery manufacturing and production plant proximity advantages of GEMC's US and European Projects

Mitchell Smith discusses the close proximity of GEMC's Norwegian nickel-copper-cobalt project to an emerging European battery manufacturing hub and how GEMC's Lovelock Cobalt-Nickel-Copper Project in Nevada is located on the doorstep of the world's largest lithium-ion battery production plant...

In a recent InvestorIntel interview, Tracy Weslosky spoke with Mitchell Smith, President, CEO and Director of Global Energy Metals Corp. (TSXV: GEMC | OTCQB: GBLEF) ('GEMC') about their recent announcement to acquire a strategic interest and NSR Royalty on a past-producing Norwegian nickel-copper-cobalt project.

In this InvestorIntel interview, which may also be viewed on YouTube (click here to subscribe to the InvestorIntel Channel), Mitchell went on to say that the Rana project is one of Norway's most significant past-producing nickel projects that is in close proximity to an emerging European battery manufacturing hub. "We see it as a near-term supply source for the European battery manufacturing market," he added. Mitchell also provided an update on GEMC's Lovelock Cobalt-Nickel-

Copper Project in Nevada located on the doorstep of the world's largest lithium-ion battery production plant. He said that there is a lot of emphasis placed on the localized supply chain of battery materials in the US and the Lovelock project represents an opportunity to supply those materials.

Global Energy Metals Corporation

Global Energy Metals is focused on offering investment exposure to the raw materials deemed critical for the growing rechargeable battery market, by building a diversified global portfolio of battery mineral assets including project stakes and sector specific equity positions. GEMC anticipates growing its business through the acquisition and development of battery mineral projects alongside key strategic partners. The Company holds 100% of the Millennium Cobalt Project and two neighbouring discovery stage exploration-stage cobalt assets in Mount Isa, Australia positioning it as a leading cobalt-copper explorer and developer in the famed mining district in Queensland, Australia. The Company holds an 85% interest in two battery mineral projects, the Lovelock Cobalt Mine and Treasure Box Project, located on the doorstep of the world's largest lithium-ion battery production plant, GigaNevada that Tesla Motors Ltd. and partner Panasonic Corp. have built in Nevada, USA. Additionally, the Company holds a 70% interest in the past-producing Werner Lake Cobalt Mine project in Ontario, Canada.
