

GEMC's Mitchell Smith on the 'megatrend opportunity' in the battery metals supply chain

written by InvestorNews | September 22, 2021

In a recent InvestorIntel interview, Chris Thompson speaks with Mitchell Smith, President, CEO, and Director of [Global Energy Metals Corporation](#) (TSXV: GEMC | OTCQB: GBLEF) ("GEMC") about how GEMC provides investment exposure to the 'megatrend opportunity' in the battery metals supply chain.

In this InvestorIntel interview, which may also be viewed on YouTube ([click here to subscribe to the InvestorIntel Channel](#)), Mitchell went on to say that GEMC offers exposure to nickel, cobalt, copper, and other metals integral to the electric vehicle and the energy storage markets through its assets in some of the world's top tier mining jurisdictions in proximity to end-use markets. Providing an update on GEMC's various assets located in Canada, the USA, Australia and Norway, Mitchell told InvestorIntel that GEMC recently listed on the OTCQB exchange in the US as there is increasing interest there in establishing a domestic battery materials supply chain.

About Global Energy Metals Corporation

Global Energy Metals Corp. offers investment exposure to the growing rechargeable battery and electric vehicle market by building a diversified global portfolio of exploration and growth-stage battery metal assets.

Global Energy Metals recognizes that the proliferation and growth of the electrified economy in the coming decades is

underpinned by the availability of battery metals, including cobalt, nickel, copper, lithium and other raw materials. To be part of the solution and respond to this electrification movement, Global Energy Metals has taken a 'consolidate, partner and invest' approach and in doing so has assembled and is advancing a portfolio of strategically significant investments in battery metal resources.

As demonstrated with the Company's current copper, nickel and cobalt projects in Canada, Australia, Norway and the United States, GEMC is investing-in, exploring and developing prospective, scalable, assets in established mining and processing jurisdictions which are in proximity to end-use markets. Global Energy Metals is targeting projects with low risks in logistics and processing , so that the projects can be fast tracked to enter the supply chain in this cycle. The Company is also collaborating with industry peers to strengthen its exposure to these critical commodities and the associated technologies required for a cleaner future.

Securing exposure to these critical metals powering the eMobility revolution is a generational investment opportunity. Global Energy Metals believes this is the time to be part of the electrification movement.
