

Exploits Discovery's Jeff Swinoga on Securing Competitive Assets in the Newfoundland Gold Region

written by InvestorNews | March 11, 2024

In an engaging interview at PDAC 2024 with Tracy Weslosky of InvestorNews, Jeff Swinoga, the President, CEO, and Director of [Exploits Discovery Corp.](#) (CSE: NFLD | OTCQX: NFLDF), shares insights into the company's strategic positioning and future prospects in the Newfoundland gold sector. Swinoga emphasizes the value of their holdings, stating, "We've got a very strategic claim called Bullseye, and in the last year, there's been 5 gold discoveries just South of our Bullseye property." This remark underscores the significant potential of their assets in a region that's rapidly becoming a hotspot for gold exploration. With a dedicated local team in Gander, NL, Exploits is well-placed to capitalize on the burgeoning gold exploration scene.

The focus of Exploits Discovery Corp.'s exploration strategies and geological interests are crucial to its ambitions, particularly along the Appleton Fault Zone. By following a path similar to industry pioneers, the company's exploration efforts at the Bullseye and the larger Gazebo properties are poised to potentially redefine its prospects. Swinoga detailed the competitive edge and determination that led Exploits to secure these prime locations, showcasing the company's resourcefulness and strategic planning in the high-stakes domain of mineral exploration.

Recent developments at the company, especially the promising

results from the expanded till sampling program at the Gazeebow South property, highlight the potential for significant gold mineralization along the Appleton Fault Zone. This advancement solidifies the northward extension of gold zones, contributing to an optimistic outlook for Exploits Discovery Corp. With upcoming assay results from the Bullseye property and the plan for further exploration, Exploits is strategically positioned to explore the geological riches of its claims, marking a potential trajectory for its future in Newfoundland's gold exploration landscape.

Colin Moore of Westward Gold talks about the value of his network of shareholder ambassadors

written by InvestorNews | March 11, 2024

In this InvestorIntel interview with host Tracy Weslosky, [Westward Gold Inc.](#)'s (CSE: WG | OTCQB: WGLIF) President, CEO & Director Colin Moore talks about Westward Gold's network of investors and provides an update on the [inaugural drill campaign](#) at their Toiyabe Project in Nevada, USA.

In the interview, which can also be viewed in full on the InvestorIntel YouTube channel ([click here](#)), Colin Moore talks about Westward Gold's 4000m drill program scheduled to start in June to step out from the existing historical resource of their Toiyabe Gold Project. Colin discusses the strategic location of Westward Gold's properties which are "in prime real estate surrounded by massive producing gold mines owned by major mining companies like Barrick, Newmont and Anglo with a 40 km² land package right in the heart of that trend." Colin also talks about Westward Gold being [featured](#) in an upcoming TV project with actor Dennis Quaid which will also be aired in the US next

month on major networks.

About West Red Lake Gold Mines Inc.

West Red Lake Gold Mines is a Toronto-based minerals exploration company focused on gold exploration and development in the prolific Red Lake Gold District of Northwest Ontario, Canada. The Red Lake Gold District is host to some of the richest gold deposits in the world and has produced 30 million ounces of gold from high grade zones. The Company has assembled a significant property position totalling 3,100 hectares in west Red Lake (the "West Red Lake Project") which contains three former gold mines located 15 km west of the Red Lake mine complex. The Mount Jamie Mine and Red Summit Mine properties are 100% owned by the Company and the Rowan Mine property is held in a 69% – 31% joint venture with Evolution Mining Limited. The West Red Lake Project property covers a 12 km strike length along the Pipestone Bay St Paul Deformation Zone and the Company is continuing to explore the property both along strike and to depth.

Joel Freudman on reporting gold in the initial assay results from TRU Precious Metals' drill program at the Golden Rose Project in Central Newfoundland

written by InvestorNews | March 11, 2024

In a recent InvestorIntel interview, Tracy Weslosky spoke with Joel Freudman, Co-Founder and CEO of [TRU Precious Metals Corp.](#) (TSXV: TRU | OTCQB: TRUIF) about the [initial assay results](#) from the recent drill program at TRU's Golden Rose Project in Central Newfoundland, Canada.

In this InvestorIntel interview, which may also be viewed on YouTube ([click here to subscribe to the InvestorIntel Channel](#)), Joel said that TRU Precious Metals is in a strong cash position while it waits for remaining assay results. With institutional investors like Eric Sprott and TSX listed Altius Minerals as the largest shareholders, Joel went on to say that institutional investors make more than 25% of TRU Precious Metals' shareholder base.

To watch the full interview, [click here](#).

About TRU Precious Metals Corp.

TRU is drilling for gold in the highly prospective Central Newfoundland Gold Belt and has an option with a subsidiary of TSX-listed Altius Minerals Corporation to purchase 100% of the Golden Rose Project, located along the deposit-bearing Cape Ray

– Valentine Lake Shear Zone. TRU also owns 100% of the Twilite Gold Project, located along the same Shear Zone, and earlier-stage properties in the region. TRU's common shares trade on the TSX Venture Exchange under the symbol "TRU", on the OTCQB Venture Market under the symbol "TRUIF", and on the Frankfurt exchange under the symbol "706".

TRU Precious Metals is seeing Gold

written by InvestorNews | March 11, 2024

In a recent InvestorIntel interview, Tracy Weslosky spoke with Joel Freudman, Co-Founder, President, and CEO of [TRU Precious Metals Corp.](#) (TSXV: TRU | OTCQB: TRUIF) about discovering [visible gold](#) early in TRU's ongoing 5,000 metre drill program at the Golden Rose Project located in the highly prospective Central Newfoundland Gold Belt.

In this InvestorIntel interview, which may also be viewed on YouTube ([click here to subscribe to the InvestorIntel Channel](#)), Joel Freudman went on to say that TRU's Golden Rose Project, located in a favorable jurisdiction between two significant gold deposits, is highly prospective for gold. With institutional investors like Eric Sprott and TSX listed Altius Minerals as the largest shareholders, Joel provided an update on TRU's [acquisitions of prospective ground](#) contiguous to their Golden Rose Project leading to more than doubling the size of the

project. In the interview, Joel also discussed the key achievements of TRU Precious Metals as they prepare to exit 2021 with a strong cash position and what to anticipate in 2022.

For Mas Gold its all focused towards gold production in Saskatchewan...

written by InvestorNews | March 11, 2024

[Co-Publisher Note: This story was written prior to the news release that came out at market open today. To access the news

release titled, **MAS Gold Corp. and Comstock Metals Ltd. Sign Letter of Intent for MAS Gold to Acquire 100% of Comstock's Preview SW Gold Project La Ronge, Saskatchewan**, [click here](#)]

Canada has several gold regions including parts of the Province of Saskatchewan. The 'La Ronge Greenstone Belt' in north central Saskatchewan is an established gold bearing zone. Since the 1940s, exploration in the region has outlined numerous gold deposits and showings, including such past producers as the Komis, Jolu, Star Lake, Contact Lake, Roy Lloyd, Golden Heart and Jasper mines.

[MAS Gold Corp.](#) (TSXV: MAS) is a Canadian exploration company focused on exploration projects in and around the prospective La Ronge Greenstone Belt of Saskatchewan, Canada. In total MAS 100% controls [33,843 hectares](#) of property in the region. The properties have reasonable infrastructure with proximity to roads, power lines, and other established mining operations (including mills). The longer term plan is to develop a hub and spoke production model with one mill being fed by multiple nearby mines.

MAS Gold's four properties are: **Henry Lake, Greywacke, Preview-North** (includes the North Lake, Point, Contact Lake, and Preview SW gold deposits), and **Elizabeth Lake**.

MAS Gold's 4 properties spread mostly along the La Ronge Gold Belt in Saskatchewan, Canada

Source: [MAS Gold company presentation](#)

Gold Resources at MAS Gold's properties include:

- **Greywacke** – The 2021 updated Resource estimate (open pit & underground) has an Indicated Resource of [101,000](#)

[contained Au oz @ 4.90 g/t](#), and an Inferred Resource of 55,000 contained Au oz @ 4.12 g/t.

- **Preview-North (North Lake deposit)** – The 2020 Resource estimate has an Inferred Resource of [417,000 contained Au oz @ 0.92 g/t](#). Drill results from the 2021 drill campaign are pending with a PEA to follow. Potential for an open pit operation. There have also been some strong early drill results at other deposits on the Preview-North Property including at the Point Au deposit ([7m @ 14.99 g/t from 20m](#)).

In addition to the above, the **Contact Lake Property** has a history of gold production at a head grade of [6.16 g/t Au](#). MAS Gold plans a drill campaign at the newly acquired property in Q1, 2022.

The Preview-North (North Lake deposit) has 417,000 contained Au oz @ 0.92 g/t with potential for an open pit operation

Source: [MAS Gold company presentation](#)

MAS Gold hub & spoke plan to mine gold from their various properties and contained deposits

Source: [MAS Gold company presentation](#)

Management and investors

MAS Gold has an [experienced management team](#) that has a successful track record of exploration success as well as success in bringing gold projects into production. As a nice

sign of confidence, [Sprott Global are investors](#) having acquired 15 million shares.

Next steps

With the 2021 drilling campaign complete, MAS Gold is expecting assay results by [end April 2022](#). In Q1 2022 the Company plans to release a consolidated Resource report, then a PEA for the Preview-North (North Lake deposit) to follow by about mid-2022.

Closing remarks

MAS Gold controls a large portfolio of 33,843 hectares spread over 4 properties in and around the highly prospective La Ronge Greenstone Belt' in north central Saskatchewan, Canada. Their two most promising properties are Greywacke with 101,000 contained Au oz @ 4.90 g/t and Preview-North (North Lake deposit) with 417,000 contained Au oz @ 0.92 g/t. Exploration upside is very exciting.

It looks like MAS Gold plans start production at one or both of the above-mentioned Indicated locations with an indicated resource and then use a hub & spoke gold production operation. Both resources have open pit potential (noting Greywacke can also go underground) which will help minimize initial capital expenditure.

MAS Gold trades on a market cap of only [C\\$14.7 million](#). Investors will need some patience but drill results so far look promising with more to come by end April 2022, followed by a PEA at Preview-North (North Lake deposit). Stay tuned in 2022.

Robert Vallis of Signature Resources speaks with Chris Thompson about High-Grade Gold Value Results

written by InvestorNews | March 11, 2024

In a recent InvestorIntel interview, Chris Thompson spoke with Robert Vallis, President, CEO, and Director of [Signature Resources Ltd.](#) (TSXV: SGU | OTCQB: SGGTF) about Signature's recent [drill results](#), which displayed significant high-grade gold values at its Lingman Lake Gold Project in the prolific Red Lake District in Ontario, Canada.

In this InvestorIntel interview, which may also be viewed on YouTube ([click here to subscribe to the InvestorIntel Channel](#)), Robert Vallis said that the drill results indicate the potential for a much larger mineralized footprint at the Lingman Lake Gold Project, and he explained how Signature has derisked the project and is well-positioned with its own drill rigs, crew, and supplies. He also said that the Lingman Lake Gold Project has a historical resource of over 234,000 oz of gold averaging 6.87 g/t and is a favorable location for finding additional large-scale high-grade gold deposition.

To watch the full interview, [click here](#).

About Signature Resources Ltd.

The Lingman Lake Gold Property consists of 1,434 staked claims, four freehold, fully-patented claims, and 14 mineral rights patented claims, totaling approximately 27,113 hectares. The property hosts an historical estimate of 234,684 oz of gold*

(1,063,904 tonnes grading 6.86 g/t with 2.73 gpt cut-off) and includes what has historically been referred to as the Lingman Lake Gold Mine, an underground substructure consisting of a 126.5-metre shaft, and 3-levels at 46-metres, 84-metres and 122-metres depths.

Joel Freudman discusses TRU Precious Metals' drill program located between two major gold deposits in Newfoundland

written by InvestorNews | March 11, 2024

In a recent InvestorIntel interview, Tracy Weslosky spoke with Joel Freudman, Co-Founder, President, and CEO of [TRU Precious Metals Corp.](https://www.trupreciousmetals.com) (TSXV: TRU | OTCQB: TRUIF) about the company's commencement of a 5,000 metre [drill program](#) at TRU's Golden Rose Project located between two major gold deposits in the Central Newfoundland Gold Belt.

In this InvestorIntel interview, which may also be viewed on YouTube ([click here to subscribe to the InvestorIntel Channel](#)), Joel Freudman said that his company's Golden Rose Project lies along the same gold-bearing corridor as its neighbors. He went on to say that TRU is in a strong cash position to continue exploration and is led by an experienced team with a track record of success. In the interview, Joel also highlighted TRU's

competitive advantages, which have attracted high-profile investors like Eric Sprott, Palisades Goldcorp, and Altius Minerals along with several institutional investors.

West Red Lake Gold on standby for NT Zone drill results

written by InvestorNews | March 11, 2024

[West Red Lake Gold Mines Inc.](https://www.sedar.com) (CSE: RLG | OTCQB: RLGMF | FSE: HYK) ('West Red Lake Gold') is focused on gold exploration and development in the prolific Red Lake Gold District of northwest Ontario, Canada. The Red Lake Gold District is host to some of the richest gold deposits in the world.

West Red Lake Gold has a [3,100-hectare](#) property with a 12 km strike length that contains three former gold mines. The Mount Jamie Mine and Red Summit Mine properties are 100% owned by the Company and the Rowan Mine property is held in a 64%/36% joint venture with Evolution Mining Limited.

West Red Lake Gold's projects in the Red Lake Gold District of Ontario Canada

[Source](#)

The Rowan Mine Property (64% owned by West Red Lake Gold as partner/operator) has an NI 43-101 Inferred Resource of [1.087 million inferred ounces](#) of gold at 7.57 g/t and is open at depth. The NT Zone is located approximately 800 meters south-east of the Rowan Mine gold deposit and is part of the Rowan Mine Property JV.

During Q1 2021, West Red Lake Gold [is drilling](#) the northern 1 km of the NT Zone as a follow-up to successful drill results from the southern 1 km portion of the NT Zone during 2019 and 2020. The Company also plans to carry out deeper drilling below the positive results previously reported in the southern 1 km portion of the NT Zone.

West Red Lake Gold also plans to drill for gold mineralization above the first level of the Rowan Mine where historic sampling on the first mine level and at surface indicate good potential for a gold-rich surface bulk sample.

The NT Zone is currently being drilled by West Red Lake Gold

[Source](#)

Closing remarks

West Red Lake continues to drill its promising NT Zone. The goal is to further expand the NT Zone gold mineralization to depth and along strike and potentially expand the gold resource. Based on the successful 2020 campaign (included [12.14 g/t gold over 13.5m](#), [5.91g/t gold over 6.0m](#)), the existing 1.087 million ounces inferred gold resource at 7.57 g/t at the nearby Rowan Mine, and the prolific gold region; I would say it is very possible West Red Lake will find further nice grade gold. The question is how much? The answer will be revealed in a few months when the latest NT Zone drill results are released. *Stay tuned.*

West Red Lake Gold has a current market cap of just C\$18 million.
