

Edward Gosselin on the potential of Kobo Resources as a pivotal player in the gold-rich grounds of West Africa

written by InvestorNews | March 19, 2024

In a comprehensive discussion at PDAC 2024, Edward Gosselin, CEO, Director, and Corporate Secretary of [Kobo Resources Inc.](#) (TSXV: KRI), shed light on the company's strategic objectives and its recent advancements in gold exploration within Côte d'Ivoire, one of West Africa's most prolific and developing gold districts, hosting several multi-million-ounce gold mines. Gosselin elucidated the company's primary mission of showcasing their venture to prospective investors and operating companies, aiming to augment their capital for an expanded drill program. Emphasizing the concept of "closeology play," Gosselin stated, "We're less than 9 km away from one of the region's largest gold mines with established processing facilities...it's a no-brainer." This strategic proximity underscores Kobo's leverage in logistics and geological similarity, making it an attractive Brownfield project.

Kobo Resources Inc., with its 100%-owned Kossou Gold Project located near the capital city of Yamoussoukro and adjacent to the substantial Yaouré mine operated by [Perseus Mining Limited](#) (ASX: PRU | TSX: PRU), is poised for growth. The company's focus on the Kossou Gold Project aims to delineate the potential size and scale of the discovery within a 9+ km strike length of highly prospective gold in soil geochemical anomalies. The completion of approximately 6,000 meters of RC drilling and 5,400 meters of trenching in 2023, with plans for further

exploration in 2024, highlights significant gold mineralization within a potentially large mesothermal gold system. Christopher Ecclestone underscores the project's strategic positioning in another [InvestorNews interview](#) with: "If Kobo strikes gold in commercial quantities, they're going to be sort of a natural prey for Perseus to move upon to provide Perseus with extended mine life with Yaouré."

The Kossou Gold Project's promising initial exploration results and the upcoming Phase 2 Diamond Drilling in March 2024 signal the project's vast potential. With a keen emphasis on rigorous exploration and the allure of significant gold anomalies, Kobo Resources Inc. represents a compelling investment opportunity, underscored by a seasoned leadership team with extensive in-country experience. The company's strategic location and exploration prowess underscore its potential as a pivotal player in the gold-rich grounds of West Africa.

About Kobo Resources Inc.

Kobo Resources is a growth-focused gold exploration company with a compelling new gold discovery in Côte d'Ivoire, one of West Africa's most prolific and developing gold districts. The Company's 100%-owned Kossou Gold Project is located approximately 20 km northwest of the capital city of Yamoussoukro and is directly adjacent to one of the region's largest gold mines with established processing facilities.

The Company is drilling to unlock the potential size and scale of Kossou within 9+ km strike length of highly prospective gold

in soil geochemical anomalies with excellent rock and trench sampling results. The Company completed ~6,000 m of RC drilling and ~5,400 m of trenching in 2023 and is planning on additional drilling and trenching in 2024. Significant gold mineralisation has been identified at three main targets within a 300 m wide, 2+ km long, pervasively altered structural corridor defining a potentially large mesothermal gold system. Kobo offers investors the exciting combination of high-quality gold prospects led by an experienced leadership team with in-country experience.

Exploits Discovery's Jeff

Swinoga on Securing Competitive Assets in the Newfoundland Gold Region

written by InvestorNews | March 19, 2024

In an engaging interview at PDAC 2024 with Tracy Weslosky of InvestorNews, Jeff Swinoga, the President, CEO, and Director of [Exploits Discovery Corp.](#) (CSE: NFLD | OTCQX: NFLDF), shares insights into the company's strategic positioning and future prospects in the Newfoundland gold sector. Swinoga emphasizes the value of their holdings, stating, "We've got a very strategic claim called Bullseye, and in the last year, there's been 5 gold discoveries just South of our Bullseye property." This remark underscores the significant potential of their assets in a region that's rapidly becoming a hotspot for gold exploration. With a dedicated local team in Gander, NL, Exploits is well-placed to capitalize on the burgeoning gold exploration scene.

The focus of Exploits Discovery Corp.'s exploration strategies and geological interests are crucial to its ambitions, particularly along the Appleton Fault Zone. By following a path similar to industry pioneers, the company's exploration efforts at the Bullseye and the larger Gazebo properties are poised to potentially redefine its prospects. Swinoga detailed the competitive edge and determination that led Exploits to secure these prime locations, showcasing the company's resourcefulness and strategic planning in the high-stakes domain of mineral exploration.

Recent developments at the company, especially the promising results from the expanded till sampling program at the Gazebo South property, highlight the potential for significant gold

mineralization along the Appleton Fault Zone. This advancement solidifies the northward extension of gold zones, contributing to an optimistic outlook for Exploits Discovery Corp. With upcoming assay results from the Bullseye property and the plan for further exploration, Exploits is strategically positioned to explore the geological riches of its claims, marking a potential trajectory for its future in Newfoundland's gold exploration landscape.

About Exploits Discovery Corp.

Exploits is a Canadian mineral exploration company focused on the acquisition and development of mineral projects in Newfoundland and Labrador, Canada. The Company is focused on discovering high-grade structurally hosted epizonal gold similar to New Found Gold's success along the Appleton Fault zone and parallel structures within the Exploits Subzone.

Exploits is utilizing its experienced, talented local team and geologic understanding with the vision to become one of the most successful explorers in Canada.

Kobo Resources' Paul Sarjeant on the significant potential for gold discovery at the Kossou Gold Project in West Africa

written by InvestorNews | March 19, 2024

In a recent InvestorNews interview with host Tracy Weslosky, Paul Sarjeant, President, COO, and Director of [Kobo Resources Inc.](#) (TSXV: KRI), shared [exciting developments](#) about their ongoing exploration program at the Kossou Gold Project located in one of West Africa's most prolific gold districts.

Paul explained that Kobo has been aggressive in advancing its trenching program, with a keen focus on the newly discovered Kadie Zone, situated just west of the Jagger Zone. Kobo has reported impressive results from both the zones, confirming significant gold soil anomalies at the Kadie Zone and strong gold mineralisation over a strike length in excess of 1.4 kilometres at the Jagger Zone. Paul further added that the Kadie Zone has been elevated to drill-ready status as part the Company's exploration strategy.

Citing their proximity to an existing gold mine, Paul discussed

Kossou Gold Project's significant potential for gold discovery, its strategic location, and existing infrastructure. As Kobo Resources continues its trenching program and prepares for drilling, Paul also provides an update on the timeline for a resource estimate on the project.

Romios Gold continues to get gold, copper & silver showings at their two Nevada Projects, but can they hit the jackpot?

written by InvestorNews | March 19, 2024

Romios Gold Resources Inc.'s (TSXV: RG | OTCQB: RMI0F) ("Romios") focus is on gold, copper and silver exploration in North America. Romios has a 100% interest in five properties in northwestern Ontario, Canada but their recent focus has been on their assets in Nevada, USA. Therefore today's article will give an update on Romios' two projects in Nevada, the Kinkaid Gold-Copper-Silver Project and the Scossa Gold Project.

Paul Sarjeant on Kobo Resources' recent drilling achievements at the Kossou Gold Project in West Africa

written by InvestorNews | March 19, 2024

In a recent interview with Investor.News host Tracy Weslosky, Paul Sarjeant, President, COO, and Director of [Kobo Resources Inc.](#) (TSXV: KRI), provides a compelling update on the company's recent [drilling achievements](#) at the Kossou Gold Project in Cote d'Ivoire, West Africa. Paul revealed that Kobo drilled nearly 6,000 meters in under five weeks with assay results confirming strong gold mineralization.

Paul Sarjeant highlighted the success of their drilling program in the Jagger Zone which continues to show promising signs of gold mineralization, with high-grade zones boasting 10-15 grams of gold per ton. They've also made noteworthy progress in the Road Cut Zone, confirming significant gold mineralization with consistent grades.

Another key highlight discussed in the interview was the discovery of the Kadie Zone on which Kobo has identified strong geochemical anomalies with results of up to 6,000 parts per billion gold in soil. Paul said that plans are already in motion to explore this area further. To access the complete interview, [click here](#)

Newfoundland is the place to

be for Leocor Gold's Shawn Ryan

written by InvestorNews | March 19, 2024

Gold prices have historically risen in response to macroeconomic trends such as inflationary pressure and market uncertainty. As we head into another period of unprecedented economic upheaval, gold is once again emerging as a shining star in the investment universe.

One Canadian company focused on exploring and leveraging the largely unexplored region of Newfoundland, Canada, is [Leocor Gold Inc.](#) (CSE: LECR | OTCQB: LECRF). [Newfoundland](#) has a long history of mining operations, and has attracted considerable recent interest and exploration capital by a large number of gold and mineral companies.

Under CEO and Director Alex Klenman, Leocor has put together a team with the experience and expertise to explore and capitalize upon this opportunity. Leocor's Technical Advisor Shawn Ryan is a renowned prospector who has been able to utilize his prospector skills to find valuable gold deposits. A New York Times profile went so far as to describe Ryan as "the king of a new Yukon Gold rush" before he turned his attention to the prolific Newfoundland region.

Leocor is focused on a handful of projects in the Newfoundland region, including the Western Exploit District. The company's three contiguous projects represent a 144,000 hectare land package in the heart of Newfoundland. Ryan introduced Leocor to this project, and his data and analysis suggest this project has the potential for new gold discoveries at scale.

Property location map. Source: company website

[On July 27, 2022,](#) Leocor announced the results of a 2021 exploration program in the Western Exploit District project known as the Hodges Hill property. Their team performed soil sampling, LiDAR surveys, and airborne magnetic-VLF surveys. The results of this exploration program identified 12 potential gold targets at the Hodges Hill property. The exploration program reported soil samples that ranged from trace to 1018.5 ppb Au, with 25 samples containing more than 50 ppb Au.

Additionally, the program also suggested the likelihood of a large body of pyroxene gabbro. This material has been associated with gold mineralization in the area. Research from the Geological Survey of Canada found that pyroxene gabbro was key to the development of the Marathon Gold's Valentine Lake deposits. The next step at this site is to perform follow-up work, such as geologic mapping, to identify high-priority targets for drill testing.

In addition to the Hodges Hill property, Leocor also [announced](#) in June that it had mobilized drilling at their Baie Verte project located in northwest Newfoundland. The company had previously announced the results of 2021 exploration activities, which identified a 7-kilometer northeast trending zone of anomalous gold in the soil and a 4-kilometer subparallel trend of anomalous copper in the soil.

Along this zone, the company identified multiple targets. These results were better than what was anticipated with this project. In particular, there is structurally controlled gold mineralization that bears similarities to the nearby Pine Cover Mine. This news led to the start of a rotary air blast (RAB) drilling program.

This program will test at least six target areas for gold and/or

copper mineralization. The company plans to drill between 25 to 30 RAB holes. If the results of the program are promising, then Leocor plans to follow up with additional diamond drilling. No results have been reported yet.

The past few years have seen a new Newfoundland gold rush, with many new discoveries and companies now on the way to production. Leocor's Technical Advisor Shawn Ryan has shown a nose for discoveries. While it is early days for Leocor, Newfoundland is definitely the place to be, and with inflation or other market forces exerting upward pressure on long-term gold, discoveries can help bring explorers to the attention of investors.

Mas Gold's Jim Engdahl on the gold market and the strong competitive advantage of having a deposit in Saskatchewan

written by InvestorNews | March 19, 2024

In a recent InvestorIntel interview, Tracy Weslosky spoke with Jim Engdahl, CEO and Director of [MAS Gold Corp.](#) (TSXV: MAS) about the recent [drill results](#) from MAS Gold's North Lake gold deposit and about the economics of gold exploration companies at the current gold price.

In this InvestorIntel interview, which may also be viewed on

YouTube ([click here to subscribe to the InvestorIntel Channel](#)), Jim Engdahl said that the North Lake gold deposit is located amongst six other former gold producing mines and that the drill result is likely to increase the deposit's resource calculation significantly. He went on to say that the deposit widens and gets higher grades as it's drilled deeper and explained how MAS Gold is going to be one of the next gold producing companies in Saskatchewan.

To watch the full interview, [click here](#).

About MAS Gold Corp.

MAS Gold Corp. is a Canadian mineral exploration company focused on exploration projects in the prospective La Ronge Gold Belt of Saskatchewan. In the belt, MAS Gold Corp. operates four properties totaling 33, 843 hectares (83, 628 acres), including the Greywacke Lake, Preview-North, Elizabeth Lake and Henry Lake Properties extending along a total of roughly 60 kilometres of the geologically prospective La Ronge, Kiseynew and Glennie Domains that make up the La Ronge Gold Belt.

MAS Gold's holdings include the Greywacke North, North Lake and Point gold deposits and the historically defined Elizabeth Lake copper-gold volcanic-hosted massive sulphide deposit.

The Greywacke North deposit, which hosts multiple known stratabound, high-grade gold-bearing zones, has an estimated 255,500 tonnes at 9.92 g/t Au (cut-off grade of 5 grams gold/tonne) for 81,500 ounces of gold, plus an Inferred Mineral Resource of an estimated 59,130 tonnes at 7.42 g/t Au for 14,100 ounces of gold (NI 43-101 Technical Report, June 1, 2016).

The North Lake deposit located at Preview North Property is estimated to contain an Inferred Mineral Resource of 14,110,000 t grading 0.92 g/t Au, hence 417,000 contained ounces of gold

(NI 43-101 Technical Report, April 10, 2020).
