

Colin Moore of Westward Gold talks about the value of his network of shareholder ambassadors

In this InvestorIntel interview with host Tracy Weslosky, Westward Gold Inc.'s (CSE: WG | OTCQB: WGLIF) President, CEO & Director Colin Moore talks about Westward Gold's network of investors and provides an update on the inaugural drill campaign at their Toiyabe Project in Nevada, USA.

In the interview, which can also be viewed in full on the InvestorIntel YouTube channel ([click here](#)), Colin Moore talks about Westward Gold's 4000m drill program scheduled to start in June to step out from the existing historical resource of their Toiyabe Gold Project. Colin discusses the strategic location of Westward Gold's properties which are "in prime real estate surrounded by massive producing gold mines owned by major mining companies like Barrick, Newmont and Anglo with a 40 km² land package right in the heart of that trend." Colin also talks about Westward Gold being featured in an upcoming TV project with actor Dennis Quaid which will also be aired in the US next month on major networks.

Jim Engdahl on MAS Gold's Saskatchewan advantage

In this InvestorIntel interview with host Tracy Weslosky, MAS Gold Corp.'s (TSXV: MAS) CEO and Director Jim Engdahl talks about the competitive advantages of Saskatchewan for gold exploration.

In the interview, which can also be viewed on the InvestorIntel YouTube channel ([click here to subscribe](#)), Jim talks about MAS Gold's significant land position in Saskatchewan's highly prospective La Ronge Gold Belt. Ranked as one of the best mining jurisdictions in the world, Jim says that Saskatchewan has well-developed infrastructure and still remains underexplored for gold. Touching upon the prevailing market uncertainties and higher gold prices, Jim explains why junior gold miners have become "exceptionally attractive," especially those in good jurisdictions.

About MAS Gold Corp.

MAS Gold Corp. is a Canadian mineral exploration company focused on gold exploration projects in the prospective La Ronge Gold Belt of Saskatchewan. MAS Gold operates four properties in the belt, including the Preview-North, Greywacke Lake, Elizabeth Lake and Henry Lake Properties that extend along segments totaling roughly 60 kilometres of the geologically prospective La Ronge, Kisseynew and Glennie Domains that make up the La Ronge Gold Belt.

MAS Gold's current projects include the North Lake, Greywacke North, Bakos (Contact Lake) and Point gold deposits and the

historically defined Elizabeth Lake copper-gold volcanic-hosted massive sulphide deposit within four properties totalling 34,703.4 hectares (85,753.8 acres).

The North Lake deposit located at the Preview-North Property is estimated to contain an Inferred Mineral Resource of 18,100,000 t grading 0.85 g/t Au, hence 494,000 contained ounces of gold (Godden, S, Thomas, D. Tupper, D. *Technical Report on the Mineral Resource Updates, North Lake and Greywacke North Gold Projects, La Ronge Gold Belt, Saskatchewan, Canada.*; effective date December 1, 2021)*. The Technical Report about the updated Mineral Resource estimate was filed on SEDAR January, 12, 2022.

The Greywacke North deposit, which hosts multiple known stratabound, high-grade gold-bearing zones, has an updated, combined open pit and underground Indicated Mineral Resource of 645,000 t averaging 4.90 g/t Au for 101,000 insitu ounces of gold (600,000 t at 4.89 g/t Au, and 45,000t at 5.03 g/t Au, respectively), plus a combined open pit and underground Inferred Mineral Resource of 410,000 t averaging 4.12 g/t Au for 55,000 insitu ounces of gold (35,000 t at 1.97 g/t Au, and 375,000 t at 4.33 g/t Au, respectively). The Indicated and Inferred Mineral Resources were estimated using open pit and underground cut-off grades of 0.65 g/t Au and 1.75 g/t Au, respectively (Godden, S, Thomas, D. Tupper, D. *Technical Report on the Mineral Resource Updates, North Lake and Greywacke North Gold Projects, La Ronge Gold Belt, Saskatchewan, Canada.*; effective date December 1, 2021). The Technical Report about the updated Mineral Resource estimate was filed on SEDAR January 12, 2022.

Alex Klenman on Leocor Gold

in Newfoundland's hotspot gold exploration district

In a recent InvestorIntel interview, Chris Thompson spoke with Alex Klenman, CEO and Director of Leocor Gold Inc. (CSE: LECR | OTCQB: LECRF) about Leocor's recent soil sampling campaign on their Western Exploit District in Newfoundland representing one of the largest land packages held by any public company in the region, which is currently a hotspot for gold exploration in Canada.

In this InvestorIntel interview, which may also be viewed on YouTube (click here to subscribe to the InvestorIntel Channel), Alex Klenman said that Leocor's exploration team is led by well-known and award-winning prospector Shawn Ryan, who has had a lot of success in the Yukon. He went on to say that Leocor is in a strong cash position as it continues to explore its Baie Verte District in Newfoundland containing multiple gold occurrences.

To watch the full interview, click here.

About Leocor Gold Inc.

Leocor Gold Inc. is a British Columbia-based resource company involved in the acquisition and exploration of precious metal projects, with a current focus in Atlantic Canada. Leocor, through outright ownership and earn-in agreements, currently controls several gold-copper projects in prime exploration ground located within the prolific Baie Verte Mining District. Leocor's Baie Verte portfolio includes the Dorset, Dorset Extension, Copper Creek and Five Mile Brook projects, creating a contiguous nearly 2,000-hectare exploration corridor. The Company also controls the 6,847-ha grassroots Startrek project near Gander, as well as three district scale land packages in North Central Newfoundland, known as Robert's

Arm, Hodge's Hill, and Leamington, (collectively "Western Exploits") representing over 144,000 hectares (1,440 square kilometers) of prospective exploration

Darren Hazelwood on Panther Metals' prospective gold projects in Ontario's Schreiber-Hemlo Greenstone Belt

In a recent InvestorIntel interview, Peter Clausi spoke with Darren Hazelwood, CEO of Panther Metals PLC (LSE: PALM) about Panther's highly prospective gold projects in the Schreiber-Hemlo Greenstone Belt in Ontario and about the listing of its Australian subsidiary on the ASX to drive forward the Australian exploration projects.

In this InvestorIntel interview, which may also be viewed on YouTube ([click here](#) to subscribe to the InvestorIntel Channel), Darren Hazelwood provided an update on Panther's drill program at the Dotted Lake Project located along a gold bearing shear-zone, and 16KM from the Hemlo mine operated by Barrick Gold. Darren went on to say that Panther Metals is focused on its Canadian projects which have strong historical indications of finding gold.

Tom Drivas on the extensive gold and copper claim holdings of Romios Gold and recent OTCQB listing

In a recent InvestorIntel interview, Tracy Weslosky speaks with Tom Drivas, President, CEO and Director of Romios Gold Resources Inc. (TSXV: RG | OTCQB: RMI0F) about being approved for trading on the OTCQB Venture Market and Romios' deal with Honey Badger Silver Inc.

In this InvestorIntel interview, which may also be viewed on YouTube ([click here to subscribe to the InvestorIntel Channel](#)), Tom went on to say that Romios has sold 80% interest in five claim blocks in Thunder Bay to Honey Badger Silver Inc. which had several high-grade silver past producers. He added that Romios has retained a 20% interest to maintain exposure to the potential production from the prospects. Tom told InvestorIntel that Romios has a portfolio of extensive

gold and copper claim holdings in the vicinity of existing producers placing "...Romios in a very good position now that the market has turned."

To watch the full interview, [click here](#)

About Romios Gold Resources Inc.

Romios Gold Resources Inc. is a progressive Canadian mineral exploration company actively engaged in precious and base-metal exploration, focused primarily on gold, silver and copper. It has a 100% interest in the Lundmark-Akow Lake gold-copper property in northwestern Ontario, 55 km NW of Newmonts' Musselwhite gold mine and extensive claim holdings covering several significant porphyry copper-gold prospects in the "Golden Triangle" of British Columbia. Additional interests include two former producers, the La Corne molybdenum mine property, Quebec and a former high-grade gold producer, the Scossa mine property in Nevada, USA. The Company also retains a 2% NSR on the Hislop gold property in Ontario.

Spotlight on Romios Gold's well positioned gold, copper and silver projects

Gold and other precious metal explorers in North America can see huge stock price pops just on a single drill result, *provided it is a great one*. We saw that with Kodiak Copper in September 2020 when the stock popped over 700% in the month following a great copper-gold porphyry drill result. For investors selecting the right junior precious metal explorer is not easy, but the rewards for success can be huge. One junior explorer that has more precious metal projects than

most miners, all in North America, is Romios Gold Resources Inc. (TSXV: RG) ('Romios').

Currently awaiting several drill results from their 2020 campaign, including from their Trek Project (potential porphyry copper-gold deposit), Romios has 25 years of experience assembling a huge fully-owned North American portfolio of precious metal (gold, silver, copper, cobalt, molybdenum) projects. Their strategy is to acquire land next to major gold projects then economically explore them for precious metals. In some cases, this is done via earn-in partners and in other cases directly by Romios.

Below is a quick overview of Romios' projects:

Golden Triangle, British Columbia projects (flagship region)

- Newmont Lake Project (approx. 58,000 hectares, currently optioned out to Crystal Lake Mining and with a 43-101 Inferred Resource with 200,000 oz contained gold at 4.43 g/t, plus 6,790,000 lbs. of copper at 0.22% and 291,000 ounces of silver at 6.4 g/t).
- Trek Project (exciting potential porphyry copper-gold target with promising early drill results).
- JW Property (includes 45 metres grading 0.24% Cu and 0.4 g/t Au).
- Royce/Porc Property (several gold-bearing, quartz-sulphide veins).

Ontario projects

- Lundmark-Akow Lake Project (2019 drill result of 8.6 g/t gold over 4.75 metres).
- Timmins Hislop Gold Project, Thunder Bay (recently claimed stakes, where historic miners found silver grades of >1,000 oz/t.).

Quebec project

- La Corne Molybdenum Project (historical resource with molybdenum and bismuth).

Nevada Project

- Scossa Gold Project (includes a historical drill result of 3.35 m @ 180.22 g/t Au, 4.02 g/t Ag). This property has a history of gold mining with very high-grade bonanza gold.

Romios Gold's numerous projects in major mining districts in North America

ROMIOS ASSETS IN FIVE MAJOR MINING DISTRICTS

Golden Triangle, BC

- Trek & JW Projects
- Newmont Lake Project (*under option to Crystal Lake Mining Corp.*)

Musselwhite-Pickle Lake, ON

- Lundmark-Akow Lake Project

Timmins, ON

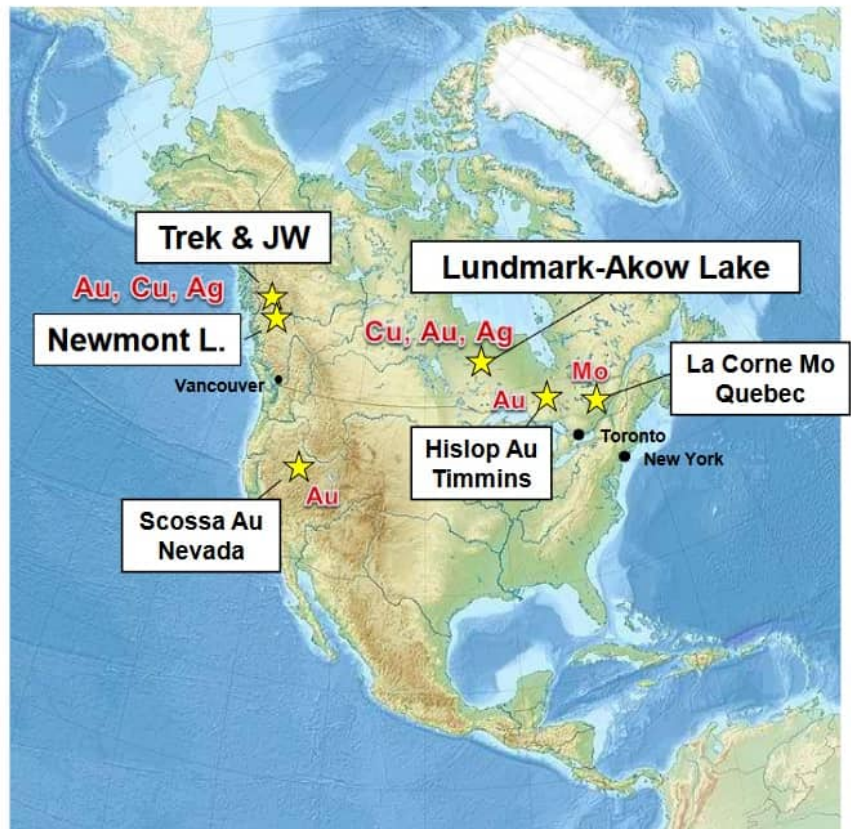

- Hislop Gold Project (2% NSR)

Val d'Or, QC

- La Corne Molybdenum Project

Sleeper/Pershing Trend, NV

- Scossa Gold Project

Source: Romios Gold company presentation

Note: Romios also recently acquired land at the Thunder Bay Camp in Ontario with four historic silver prospects.

With so many early-stage exploration projects it can be hard for companies to progress them rapidly. Romios is currently boosting awareness of their Company to boost capital and therefore accelerate exploration across so many promising

targets.

At Newmont Lake, they have optioned out the exploration in return for a 2% NSR royalty, 12 million common shares of Enduro Metals Corporation (previously Crystal Lake Mining), and cash payments. In return, Enduro must complete an \$8 million, three-year exploration plan.

Looking ahead to 2021

Romios is still awaiting drill assay results from some of their 2020 exploration work and based on results intends to actively explore their best prospects further in 2021.

Specifically the 2020 drill results from the promising Trek Project porphyry copper-gold targets (includes Trek South) and the Andrei target at Newmont Lake. The Trek Project has an approximate 5.0 km strike-length of mineralization along deep basement structures. Work in previous years included 35 drill holes that returned assays up to 131 metres @ 0.6% Cu, 0.39 g/t Au and 8.5 g/t Ag. The Trek Project is located 10 km SE of the enormous (>1.1 billion tonne) Galore Creek porphyry Cu-Au deposits which are owned by the Teck-Newmont JV.

Romios is also awaiting 2020 drill results from their Lundmark-Akow Lake Project in Ontario Canada. These are intended to follow up on Romios' exciting 2019 discovery of 8.6 g/t gold over 4.75 metres.

Romios Gold's Trek Project in the Golden Triangle of British Columbia, Canada

ROMIOS GOLD RESOURCES INC. –TREK NORTH ZONE

Source: Romios Gold company presentation

Closing remarks

They say timing is everything in mining investing and that certainly can be true with junior precious metal explorers. Romios Gold Resources currently trades on a very low market cap of C\$12M. And with such a large exploration package of properties, and gold at US\$1,845/oz and copper at US\$3.78/lb, we look forward to their drill results.

- Tom Drivas on Romios Gold's well positioned gold, copper and silver projects in North America (video)

Disclosure: The author is long Romios Gold Resources Inc. (TSXV: RG)

CBLT continues to build value for shareholders and looks set to benefit from Ready Set Gold

CBLT Inc. (TSXV: CBLT) had a great 2020 with the stock price up 200%. This is because the Company continues to make deals that add value for shareholders and avoids stock dilution, the latest deal being CBLT's 6.1% share in today's CSE listing of Ready Set Gold (CSE: RDY) ('RDY'), a promising gold exploration play. RDY is anticipated to commence trading on January 12, 2021 under the symbol "RDY" on the Canadian Securities Exchange (CSE).

CBLT Inc. offers investors exposure to multiple Canadian cobalt and precious metals projects, an equity share in RDY and any sale proceeds, and management's strong track record of deal making.

CBLT owns 1,833,333 shares (approximately 6.1%) of RDY. CBLT has received its first release from escrow of 458,333 free-trading shares. There are three remaining escrow releases of the same number of shares, to take place on or about April 18, June 18 and August 18, all in 2021. RDY's last financing was carried out at C\$0.75 per share, giving CBLT's holding an implicit value of over \$1,300,000. **CBLT Inc. stands to benefit by selling some of its RDY holdings as it comes out of escrow to mitigate downside risk and holding on to the remainder to ride the 'gold and Hemlo' wave.**

The Ready Set Gold announcement above gives a good summary of the company quoted below:

- “A basket of gold projects in the Hemlo area in Ontario with a focus on high-grade gold exploration and development potential, including the 100% owned Northshore Gold Project hosting **Indicated Resources of 391,000 oz Au** in 12.36 million tonnes at **a grade of 0.99 g/t** and **Inferred Resources of 824,000 oz Au** in 29.58 million tonnes **at 0.87 g/t Au** using a cut-off grade of 0.50 g/t Au. (NI43-101 Technical Report – 2014).
- A proven team of public company executives and explorers focusing on profitable exits for shareholders.
- Low share float of 29.8 million shares outstanding and 37.1 million shares fully diluted.”

Note: Bold emphasis done by the author.

The background on this deal involved CBLT Inc. selling its 56% share of the Northshore Gold Property Joint Venture to Omni Commerce Corp. (“Omni”). For the sale CBLT Inc. received \$350,000 in cash and \$1,100,000 in common shares of Omni. Subsequently RDY formed out of an amalgamation agreement dated August 12, 2020, between Omni and RDY, effectively meaning CBLT Inc. became a RDY equity holder.

A deeper look at Ready Set Gold (‘RDY’)

RDY states that its mission is to discover, expand, develop high grade, economic gold deposits on proven and prolific greenstone belts in Canada with an initial focus on Ontario. As mentioned above in the CBLT announcement RDY has already discovered significant gold ounces, or as reported in their presentation a total of 1.22 million ounces. The indicative market cap for the initial listing is C\$22 million fully diluted, which gives a market cap per ounce of US\$18/oz, well below most competitors. Of course RDY is a new listing and has a significant percentage of their gold still in the lower Inferred category, so this must be taken into consideration when comparing to peers.

2021 will see Phase 1 drilling of 3,000 meters of infill drilling and upgrading of the Inferred Resource. This will be followed by Phase 2 drilling of another 3,000 meters, including of new targets. This should lead to plenty of news flow in H1 2021.

Ready Set Gold's 3 key gold projects – Northshore, Hemlo Eastern Flanks, and Emmons Peak

Ready Set Gold company highlights

LOCATION	TEAM	OUNCES	STRATEGY	QUALITY
A proven jurisdiction with many multi-million ounce neighbours that operate at industry leading low costs	A proven team of public company managers and explorers with a focus on profitable exits for shareholders	100% ownership of the Northshore Gold Project with a historical 2014 NI 43-101 Indicated Resources of 391,000 oz Au and Inferred Resources of 824,000 oz Au	A bold & fast-paced strategy to produce exciting short-term results for shareholders	An exceptional basket of projects with a focus on high-grade gold with exploration and development potential

Source: RDY company presentation

About CBLT Inc.

CBLT Inc. is a project generator with a focus on quality cobalt projects in safe jurisdictions such as Canada. CBLT has numerous projects in Canada. CBLT's flagship is the Copper Prince Project located in Falconbridge Township, in the Sudbury Mining District of Ontario, Canada. The Project has Cu-Ni-PGM and gold occurrences. Sample 616311 found 54.3g/t Au and 5,020 ppm (0.502%) Co. CBLT also owns the Chilton Cobalt Project in the Grenville Subprovince in Quebec, which contains two areas with large nickel-copper-cobalt-chromium findings. In total CBLT has its hands in over 10 projects in Canada. You can read more in my past articles [here](#) and [here](#).

Closing remarks

CBLT Inc. still has a low market cap of only C\$4.7 million despite their tremendous stock price performance in 2020. By buying into CBLT Inc. investors gain exposure to over 10 projects in Canada with base metals (Co, Ni, Cu) and precious metals potential (Au, Ag, PGMs), some equity exposure in Ready Set Gold which is due to list today, and management's deal making skills that has a proven track record of adding value for shareholders without stock dilution. Be quick!

Frank Basa on Granada Gold's key positioning in Quebec's Cadillac Trend and the 2021 Gold Market

In a recent InvestorIntel interview, Tracy Weslosky speaks with Frank Basa, Director, President and CEO of Granada Gold Mine Inc. (TSXV: GGM) discusses their key positioning in

Quebec's Cadillac Trend, the rising value of gold and how this will translate into the marketplace in 2021.

In this InvestorIntel interview, which may also be viewed on YouTube (click here to subscribe to the InvestorIntel Channel), Frank responds to Tracy's questions about Matt Bohlsen's article on why they may be 'flying under the investment radar' with, "We are on the Cadillac break, and of course anybody who is on the Cadillac break usually ends up with a multi-million-ounce deposit, which we did get."

Frank goes on to explain changes that will positively affect the economics for Granada Gold, the impact of the gold market on the M&A market and adds **"This is just the beginning of a long bull market for gold, and with our location; our infrastructure – we're in a great position."**

About Granada Gold Mine Inc.

Granada Gold Mine Inc. is continuing to develop the Granada Gold Property near Rouyn-Noranda, Quebec. The property includes the former Granada gold mine which produced more than 50,000 ounces of gold at 10 grams per tonne gold in the 1930's before a fire destroyed the surface buildings. Approximately 120,000 meters of drilling has been completed to date on the property, focused mainly on the extended LONG Bars zone which trends 2 kilometers east west over a potential 5.5 kilometers mineralized structure. The highly prolific Cadillac Trend, the source of 50 million plus ounces of gold production in the past century, cuts right through the north part of the Granada property on a line running from Val-d'Or to Rouyn-Noranda Quebec.

The Company is in possession of all permits required to commence the initial mining phase known as the "Rolling Start", which allows the company to mine up to 550 tonnes per day, capable of producing up to 675,000 tonnes of ore over a

3-year period of time. Additional information is available at www.grnadagoldmine.com.

Peter Clausi on CBLT's sale of Northshore Gold for \$1.5 million cash and shares

InvestorIntel's Tracy Weslosky speaks with Peter Clausi, President, CEO and Director of CBLT Inc. (TSXV: CBLT) about the sale of CBLT's Northshore Gold Property to Omni Commerce where CBLT ended up being the largest shareholders in Omni. "CBLT purchased a portfolio of four mining assets two years ago," Peter said. "Paid roughly a million dollars for it. We just sold one of those assets for \$1.5 million."

"We do mineral exploration, but we also do opportunistic M&A," Peter added. "Any property that is good enough to buy is good enough to sell if you can make profit for the shareholders." He added, "We have been buying properties inexpensively and then selling them to bidders who could not get their hands on the properties in the first place, and making significant profit for the shareholders." He continued, "In 2016-17 we generated over a million dollars in revenue for the shareholders against acquisition cost of about a \$160,000."
