

Stephen Burega provides an update on Cambodia's 1st North American Publicly Traded Mineral Exploration Company

In a recent InvestorIntel interview Peter Clausi speaks with Stephen Burega, CEO of Angkor Resources Corp. (TSXV: ANK) about Angkor's gold, and oil & gas projects in Cambodia. Angkor is the first North American publicly traded mineral exploration company in Cambodia with 5 licenses covering approximately 1000KM².

In this InvestorIntel interview, which may also be viewed on YouTube (click here to subscribe to the InvestorIntel Channel), Stephen discussed how Angkor's team has built strong relationships with local communities and all levels of government in Cambodia. He starts: "If you are not liked in the communities you are working in, it makes it very difficult regardless of the quality of assets..." Adding that Angkor is the only company to have an onshore oil block in Cambodia, he provides an update on Angkor's Oil and Gas license, and an update on the Andong Meas and Koan Nheak License.

Drolet Stock Notes on Harfang Exploration: Gold Explorer in the James Bay Mining Camp in Quebec

Mario Drolet, President of MI3 Communications Financières Inc. (MI3), released his Drolet Stock Notes on Harfang Exploration Inc. (TSXV: HAR) on February 23, 2021, for exclusive distribution on InvestorIntel. Highlights include:

- Generating new gold districts in James Bay, Québec.
- Excellent share structure (63M shares outstanding) with strong support from the Osisko Group and Quebec institutional Funds.
- Located on key geological domains (greenstone belts, major tectonic boundaries).
- HAR has world class management (Andre Gaumont as Chairman)
- Support: S2; \$ 0.40 S1; \$0.45 Resistance: R1; \$0.47 R2; \$0.495

About Harfang Exploration Inc.

Harfang is a mining exploration company whose primary mission is to discover new gold districts in the province of Québec. Harfang's development model is based on the generation of new mining projects and on the establishment of partnerships with major exploration and mining companies to advance its exploration projects.

PLEASE DO YOUR DUE DILIGENCE

Betting on gold in Newfoundland, TRU Precious enters the race.

Did you know that Newfoundland in Canada is the latest hot spot for gold exploration? A wave of junior miners are rushing to get land positions in the area after the New Found Gold Corp. discovery of 92.86 g/t gold over 19m (included 285.2 g/t Au over 6.0 meters) was announced in January 2020. A major advanced project in Newfoundland is the Valentine Project that has proven and probable reserves of 1.87 million ounces of gold and a resource estimates of 3 million M&I ounces of gold. Today's company has already staked a massive 23,000 hectares in the highly-prospective Central Newfoundland Gold Belt, with one of their projects practically right next to the Valentine Project and another right next to New Found Gold's Project.

That company is TRU Precious Metals Corp. (TSXV: TRU | OTCQB: TRUIF) ('TRU'). TRU is a gold exploration company with a district-scale land package of 23,000 ha in the Central Newfoundland Gold Belt. TRU's major project is the Golden Rose Project/Property which lies just near Marathon Gold Corp.'s Valentine Project, which holds the largest undeveloped gold resource in Atlantic Canada.

TRU Precious Metals Corp. portfolio of projects in Newfoundland (location map)

Source: Company presentation

TRU has five properties at various stages of exploration. They are:

- **The Golden Rose Project (subject to entering into a definitive 100% option agreement)** is a regional-scale land package covering 105 km² within the Valentine Lake structural corridor, hosting over 45 km of prospective strike length for gold mineralization. It is easily accessible via provincial highway and forest access roads. It is located between Marathon Gold Corp.'s Valentine Gold Project to the northeast and Matador Mining Ltd.'s Cape Ray Gold Project to the southwest. Selected drill intercepts include **1.37 g/t Au over 26.31 m** and **2.15 g/t Au over 12.6 m**. There has also been a 65 g/t Au historic grab sample. There are 6 distinct gold showings/ prospects already identified.

- **The Twilite Gold Project (100% owned)** is located along a structural corridor with other gold deposits such as Cape Ray and Valentine Lake. The Project has a historical drill hole interval of **5.1 g/t Au over 5.8 m, from 14.2 m to 20 m depth**. There is also a 202 g/t Au grab sample in a zone of quartz veining and silification.
- **The Rolling Pond Property (option to 100% own)** is host to a large, well-preserved, highly underexplored hydrothermal quartz vein system up to 50-75 m wide (true width) containing anomalous gold grades. The over 1.7 km long main zone remains open along its strike length. Its neighbour is New Found Gold's Queensway Project.
- **The Stony Lake Property** is an underexplored 2,675 ha with historical samples with visible gold. There is a mineralized zone known as the "Cliff Showing".
- **The Gander West** is untested ground with quartz veins in outcrop 16 km from where NFG had a drill hole interval of 92.86 g/t gold >19 m.

TRU Precious Metals Corp. five exploration stage projects in Newfoundland

CURRENT PROPERTY HOLDINGS

Source: Company fact sheet

The Central Newfoundland Gold Belt has good existing infrastructure including power and year-round access and exploration ability.

TRU has an experienced management team as you can read here. VP Property Development & Director, Barry Greene, is a Newfoundland-based geoscientist with over 30 years of experience.

Closing remarks

One advantage of heading to more remote and under-explored locations such as Newfoundland is that there is always the chance of a huge discovery. We saw that in Alaska and perhaps next will be Newfoundland.

TRU Precious Metals Corp. trades on a market cap of just C\$8.3 million. Risk is significant being an early-stage gold explorer, but there is also huge upside if they can strike significant gold in Newfoundland.

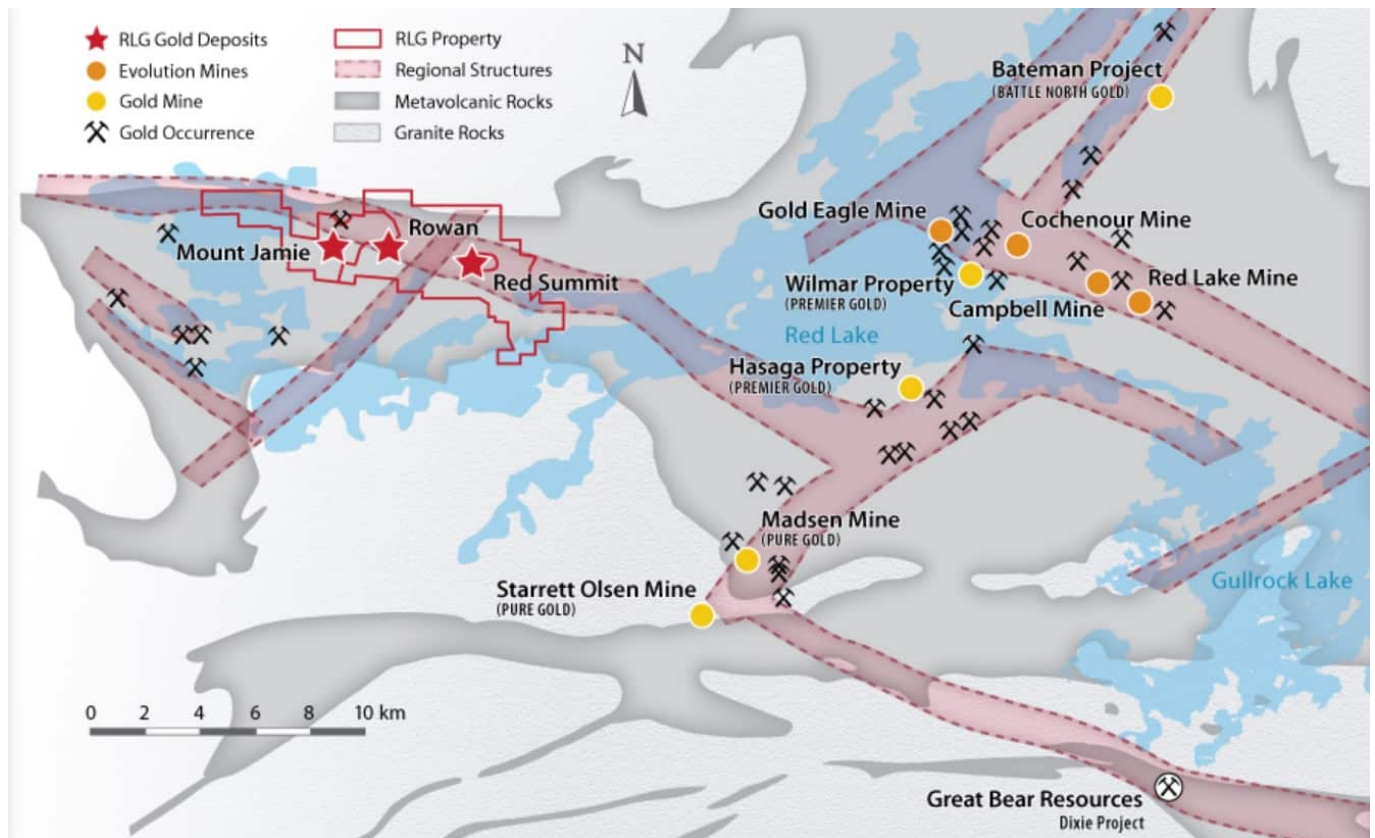

West Red Lake Gold on standby for NT Zone drill results

West Red Lake Gold Mines Inc. (CSE: RLG | OTCQB: RLGMF | FSE: HYK) ('West Red Lake Gold') is focused on gold exploration and development in the prolific Red Lake Gold District of northwest Ontario, Canada. The Red Lake Gold District is host to some of the richest gold deposits in the world.

West Red Lake Gold has a 3,100-hectare property with a 12 km strike length that contains three former gold mines. The Mount

Jamie Mine and Red Summit Mine properties are 100% owned by the Company and the Rowan Mine property is held in a 64%/36% joint venture with Evolution Mining Limited.

West Red Lake Gold's projects in the Red Lake Gold District of Ontario Canada

Source

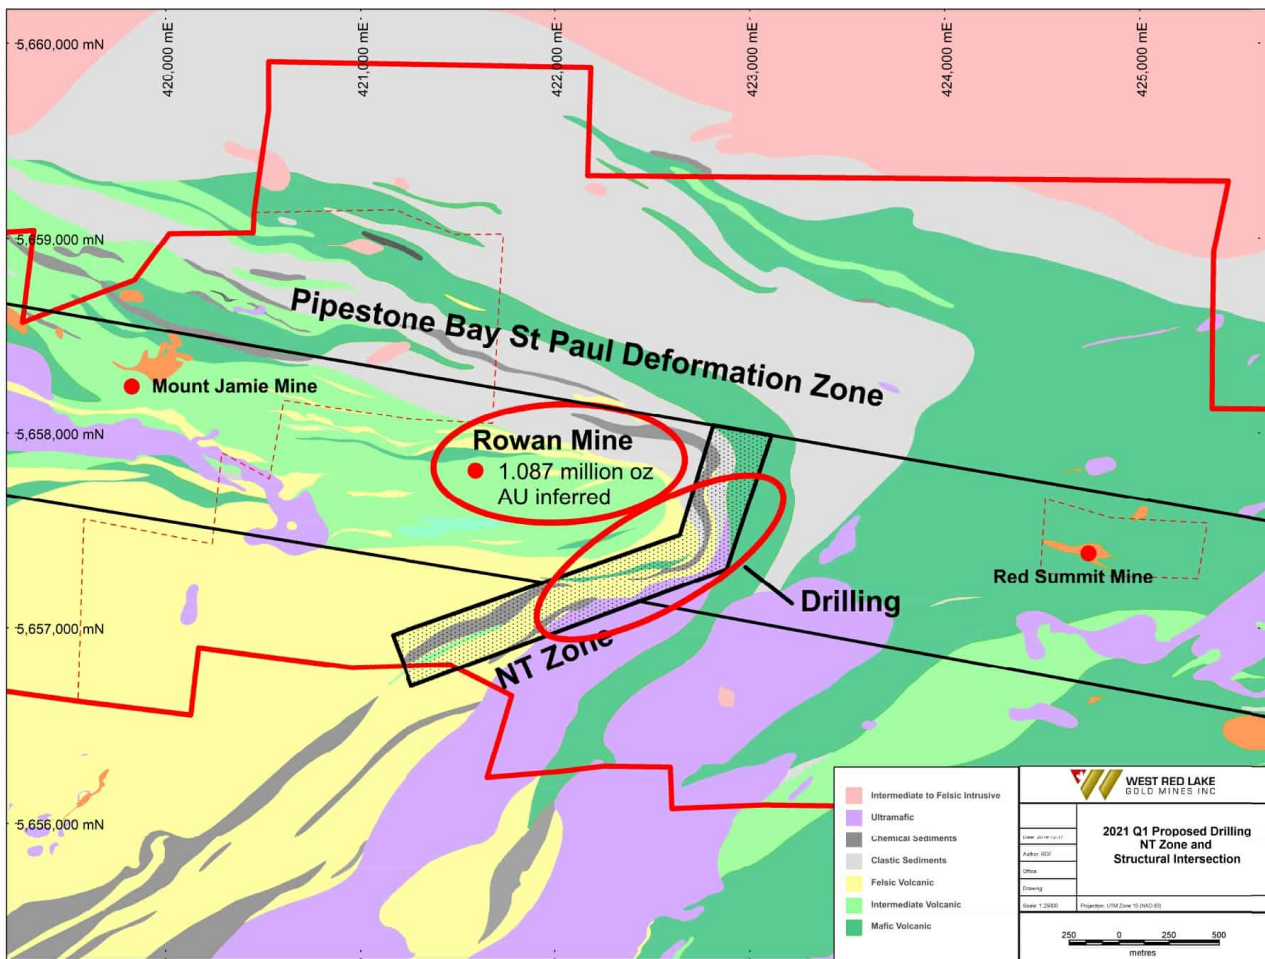

The Rowan Mine Property (64% owned by West Red Lake Gold as partner/operator) has an NI 43-101 Inferred Resource of 1.087 million inferred ounces of gold at 7.57 g/t and is open at depth. The NT Zone is located approximately 800 meters south-east of the Rowan Mine gold deposit and is part of the Rowan Mine Property JV.

During Q1 2021, West Red Lake Gold is drilling the northern 1 km of the NT Zone as a follow-up to successful drill results from the southern 1 km portion of the NT Zone during 2019 and 2020. The Company also plans to carry out deeper drilling below the positive results previously reported in the southern

1 km portion of the NT Zone.

West Red Lake Gold also plans to drill for gold mineralization above the first level of the Rowan Mine where historic sampling on the first mine level and at surface indicate good potential for a gold-rich surface bulk sample.

The NT Zone is currently being drilled by West Red Lake Gold

Source

Closing remarks

West Red Lake continues to drill its promising NT Zone. The goal is to further expand the NT Zone gold mineralization to depth and along strike and potentially expand the gold resource. Based on the successful 2020 campaign (included 12.14 g/t gold over 13.5m, 5.91g/t gold over 6.0m), the

existing 1.087 million ounces inferred gold resource at 7.57 g/t at the nearby Rowan Mine, and the prolific gold region; I would say it is very possible West Red Lake will find further nice grade gold. The question is how much? The answer will be revealed in a few months when the latest NT Zone drill results are released. *Stay tuned.*

West Red Lake Gold has a current market cap of just C\$18 million.

Drolet Stock Notes on Beauce Gold Fields: Looking for the Gold Source in the Heart of the First Canadian Gold Rush

Mario Drolet, President of MI3 Communications Financières Inc. (MI3), released his Drolet Stock Notes on Beauce Gold Fields Inc. (TSXV: BGF) on February 22, 2021, for exclusive distribution on InvestorIntel. Highlights include:

- Beauce Gold Fields is a gold exploration company focused on placer to hard rock exploration in the Beauce region of Southern Quebec, Canada.
- Exploration by BGF discovered a major fault line as the probable source of the placer gold channel.
- Tight capital structure with 37.8M shares outstanding
- BGF recently rebound and trending higher ...
- Support: S2; \$0.14 S1; \$0.17 Resistance: R1; \$0.19 R2; \$0.21

About Beauce Gold Fields

Beauce Gold Fields is a gold exploration company focused on placer to hard rock exploration in the Beauce region of Southern Quebec. The Company's flagship property is the St-Simon-les-Mines Gold project site of Canada's first gold rush that pre-dates the Yukon Klondike. The Beauce region hosted some of the largest historical placer gold mines in Eastern North America that were active from 1860s to the 1960s. It produced the largest gold nuggets in Canadian mining history (50oz to 71oz). The intent of Beauce Gold Fields is to trace the workings back to the bedrock source and uncover economic gold mineralization.

Comprising 152 contiguous claims and 7 real estate lots, the project area contains a six-kilometer long placer channel consisting of an unconsolidated gold-bearing auriferous units of a lower saprolite and an upper brown diamictite. The Company has calculated a theoretical Gold Exploration Target for the entire historical placer channel ranges between **61,000 ounces** (2,200,000 m³ @ 0.87g Au/m³) and **366,000 ounces*** (2,200,000 m³ @ 5.22 g Au/m³).

PDAC 2021: The world's largest mining show goes virtual

As the COVID-19 pandemic continues to impose travel restrictions and limitations on the size of gatherings, large and in-person events in Canada are challenging to hold.

With this in mind, the **89th Prospectors & Developers Association of Canada (PDAC)** conference shifted to cyberspace this year as the world's largest mineral exploration and mining event decided that a virtual event would be safer than getting over 23,000 people together in a conference hall.

The annual conference, which brings together mining executives, geologists, analysts, investors, students, and government officials, will be held online and aims to offer attendees the same ability to connect with the global mineral exploration and mining community.

InvestorIntel returns again this year as a **PDAC** 2021 media partner.

Virtual PDAC

PDAC plans to offer over 100 hours and more than 100 sessions of unique content. Similar to previous years, the online event will be divided into different programs including Capital Markets, Investor Exchange, Presentation Rooms, Sustainability, Geoscience, and Short Courses.

An advantage of the virtual conference is that the platform will be available 24 hours a day and, after the “live” presentations are finished, the content will be available on-demand for three months following the conference.

With thousands of companies attending and presenting, even as a virtual attendee, preparation is key when “exploring” for the next investment “gem”.

Presentations for Investors

The Corporate Presentation Forum for Investors (CPFI) is changing for 2021 and will combine insights from industry thought leaders such as John Kaiser of Kaiser Research and Frank Holmes of US Global Investors, with links to selected company presentations.

To allow attendees to focus on specific commodities, the CPFI Showcase groups together similar companies into categories: base and energy materials, diamonds, gold explorers, gold producers, royalty companies, silver, and uranium.

Other key sessions and events for investors include:

- Capital Markets Program
 - “Profits with a Purpose” with Aline Cote of Glencore, Mark Bristow of Barrick Gold, and Evy Hambro of BlackRock.
- Letter Writer Presentations for Investors
 - Rick Rule of Sprott, Brent Cook of Exploration Insights, and Gwen Preston of Resource Maven.
- Keynote speakers
 - “The Fate of Gold Deposits” with Douglas Silver of Flydentity.

During these presentations, attendees can participate in group discussions and breakout rooms, and connect with the speakers. Companies will have virtual booths with chat rooms and the ability to book 1-on-1 meetings with the exhibitors.

Questions to Ask Exploration Companies

The Investors Exchange returns in a virtual format, allowing investors to connect with leading junior mining companies, mid-sized producers, and major mining companies, to discuss investment and project potential.

Even at a virtual conference, plan to ask companies questions. Key factors when deciding to invest in an exploration company include:

- **Deposit:** What commodity is the company targeting? What is the grade? How far below the surface is the mineralization?
- **Location:** Where is the deposit located? Is it located in a mining-friendly jurisdiction? Is it accessible year-round? Is it near power?
- **Management:** Does the management team have experience with that specific mineral? Have they been successful in the past? Who leads the company’s exploration efforts?
- **Funding:** Do they have the cash in the bank to fund exploration for the next 12-18 months? How much

financing will they require?

Virtual Entertainment and Cocktail

PDAC also wants attendees to enjoy the social side of the conference and included a variety of entertainment including musical acts, tours, and interactive events.

For example, hosted by an award-winning mixologist, the Peru Cocktail event includes learning how to create Peru's famous signature cocktails. Don't forget to have a bottle of Pisco and all of the ingredients at the ready.

Save the Date – PDAC is from March 8-11

The **PDAC** convention is scheduled to run this year from March 8-11.

To learn more about the virtual conference and download the **PDAC** 2021 Preliminary Program, you can visit the PDAC Convention webpage.

To register for the event, you can visit the PDAC Registration webpage.

Hope to see you “virtually” there!

DISCOVER INVESTMENT OPPORTUNITIES & VALUABLE INSIGHTS

2021

THE WORLD'S PREMIER
MINERAL EXPLORATION
& MINING CONVENTION

MARCH 8-11

VIRTUAL CONVENTION

JOIN FROM ANYWHERE IN THE WORLD

pdac.ca/convention
#PDAC2021

HOW THE PDAC VIRTUAL CONVENTION WORKS

The Convention will take place within a virtual venue called a platform, comparable to a physical venue. Event components that attendees would traditionally experience in-person will be presented virtually. A virtual convention offers attendees more benefits than ever before!

GLOBAL CONNECTIONS

Access to a broader global audience and even more valuable business connections with investors, financiers, banking executives, fund managers, brokers, analysts and more!

MATCHMAKING

Facilitated matchmaking based on all participants' interests in order to deliver the most focused networking experience.

DISCUSS INVESTMENT POTENTIAL AT THE ONLINE EXHIBIT HALL

Book meetings with junior and major mining companies, mid-sized producers, prospectors, financial institutions, international governments and suppliers.

MUCH MORE THAN A WEBINAR

Attend various interactive presentations with breakout sessions, group discussions and be among your peers.

BROADER ACCESS

Attend virtual networking lounges, educational sessions and entertainment all from the comfort of your home or office.

Frank Basa on restructuring Granada Gold's project to a high-grade deposit

In a recent InvestorIntel interview, Tracy Weslosky spoke with Frank Basa, President, CEO, and Director of Granada Gold Mine Inc. (TSXV: GGM) about restructuring its Granada gold project to a high-grade deposit.

In this InvestorIntel interview, which may also be viewed on YouTube (click here to subscribe to the InvestorIntel Channel), Mr. Basa said that with the recent release of new resource numbers, Granada Gold has converted the previous low-grade 1 g/t Au open pit to a higher-grade deposit with a combined smaller 2 g/t open pit and a potentially much larger 4 g/t underground. The company intends to continue with its 120,000 meter drill program to significantly upgrade the resource to about 2.5-3 million ounces, the majority of which will be underground at 4 g/t. "4 g/t underground on the Cadillac Break, very few people have that," said Mr. Basa.

He also commented on the competitive advantages of the Granada gold project's location on the Cadillac Break. "The majors are showing up. They are looking for companies...If we hit 2.5-3 million ounces...we are looking at ourselves as a takeout target," said Mr. Basa.

To watch the full interview, click here

About Granada Gold Mine Inc.

Granada Gold Mine Inc. continues to develop the Granada Gold Property near Rouyn-Noranda, Quebec. Approximately 120,000 meters of drilling has been completed to date on the property, focused mainly on the extended LONG Bars zone which trends 2 kilometers east-west over a potential 5.5 kilometers of

mineralized structure. The highly prolific Cadillac Break, the source of more than 75 million plus ounces of gold production in the past century, cuts through the north part of the Granada property, but is not necessarily indicative of mineralization hosted on the company's property.

The Granada Shear Zone and the South Shear Zone contain, based on historical detailed mapping as well as from current and historical drilling, up to twenty-two mineralized structures trending east-west over five and a half kilometers. Three of these structures were mined historically from two shafts and two open pits. Historical underground grades were 8 to 10 grams per tonne gold from two shafts down to 236 m and 498 m with open pit grades from 5 to 3.5 grams per tonne gold.
