

Roger Rosmus on Goliath Resources' high-grade gold discovery in the Golden Triangle

"Of the four, two are the focus this year. One is where we have discovered a brand new gold-copper-molybdenum porphyry system – Lucky Strike property. Another one is the Golddigger property just south of Stewart, BC which is actually in the Golden Triangle (area), which is more of a VMS type of target for us...we are looking at high grade multi ounce silver and multi ounce gold..." States Roger Rosmus, Founder, CEO & Director of Goliath Resources Limited (TSXV: GOT | OTCQB: GOTRF), in an interview with InvestorIntel's Tracy Weslosky.

Roger went on to say that Goliath is a project generator that has made multiple new discoveries this year. The company is focused on the prolific Golden Triangle and the surrounding area located in northwestern British Columbia. He said that the Golden Triangle has the potential for multiple returns on investment. Roger also said that over 67% of all Canadian gold production comes from orogenic hinge zone and veins. Goliath owns 10% of a project that has a discovery of orogenic hinge zone and multiple veins running one to five kilometers long and is very wide.

MI3 Market Alert: Awaiting on drilling results on monster porphyry system in BC Golden Triangle

Mario Drolet President of MI3 Communications Financières Inc. (MI3) released a technical note at market open today on Goliath Resources Ltd. (TSXV: GOT | OTCQB: GOTRF) for exclusive distribution on InvestorIntel. In this note, MI3 highlighted the following points on Goliath Resources Ltd.

- Goliath Resources is a precious metals project generator focused in the prolific Golden Triangle and surrounding area of northwestern British Columbia.
- It successfully completed three drill holes as of August 26, 2019 for a total of 1741 metres containing wide spread disseminated sulphides from its inaugural diamond drilling program at its newly discovered Lorne Creek Au-Cu-Mo Large Porphyry System.
- All three holes contained widespread sulphides from collar to termination at 718 metres, 501 metres, and 522 metres respectively that all remain open. These early results exceeded expectations confirming the presence of a robust porphyry system that remains open and under-explored,
- RSI at 49 ... expecting rebound and awaiting drilling results ... very good volume in the last month
- Support: S2; \$0.085 – S1; \$0.10 Resistance: R1; \$0.105 – R2; \$0.115

About Goliath Resources Limited

Goliath Resources Limited is a precious metals project generator focused in the prolific Golden Triangle and surrounding area of northwestern British Columbia. It controls four highly prospective properties that include Bingo, Golddigger, Lucky Strike and Copperhead covering over 52,000 hectares.

All four properties have returned widespread mineralization of high grade Gold, Silver and/or Copper from exposed bedrock in situ at surface. The new Lorne Creek Au-Cu-Mo Porphyry and Gold Source hydrothermal breccia discoveries at the Lucky Strike Property are scheduled to have their inaugural drill

program in July 2019.

These new discoveries are the result of glacial recession and snowpack melting in geological settings where world class deposits have been found within the Golden Triangle and surrounding area.

MI3 Market Alert: Drilling for monster porphyry system in British Columbia

Mario Drolet President of MI3 Communications Financières Inc. (MI3) released a technical note at market open today on Goliath Resources Ltd. (TSXV: GOT | OTCQB: GOTRF) for

exclusive distribution on InvestorIntel. In this note, MI3 highlighted the following points on Goliath Resources Ltd.

- Goliath Resources is a precious metals project generator focused in the prolific Golden Triangle and surrounding area of northwestern British Columbia.
- Goliath extends first drill hole to **718 metres** on new Au-Cu-Mo porphyry system that remains open ... Second hole drilling is underway with a planned depth of ~700 meters....
- Controls four precious metals properties covering over 52,000 hectares.
- Newly Discovered – Lorne Creek Au-Cu-Mo Porphyry is at the headwaters of Lorne Creek, the most prolific placer gold producer in the district.
- Grabs from surface of the porphyry center assayed up to 2.95 g/t Au, 133 g/t Ag 4.5% Cu 0.34% Mo. (surface grades are not indicative of the core grades – assays are pending).
- Rebounding from \$0.055 ... spike in volume ... Positive MACD ...Awaiting drill assays
- GOT traded over 12 Million shares between \$0.055 and \$0.105
- *Support: S2; \$0.07 – S1; \$0.09 Resistance: R1; \$0.105 – R2; \$0.13 Breakout: above \$0.16*
