Frank Basa on the competitive advantages of Granada's high grade gold mine

written by InvestorNews | July 14, 2020

"We are on the Cadillac Trend. If there is any address that you should be on in North America or Canada is the Cadillac trend. It is known for producing multi million ounce deposits. Over 140 million ounces have been mined in the immediate area. Any deposit that anybody has ever worked on the Cadillac Trend has found lots of gold, high recoveries, high grades. That's the norm. Our project is also the same. When it was operated, it was about 9.7 grams per ton…" States Frank Basa, President, CEO and Director of Granada Gold Mine Inc. (TSXV: GGM), in an interview with InvestorIntel's Tracy Weslosky.

Frank went on to say that Granada Gold is ready to ride the wave of rising gold prices. Frank also said that the company has discovered at-surface mineralized structures with significant visible gold at its Granada Mine. Granada Gold has decided that the local mills would not be able to process this mineralized material without a significant modification of the process flowsheet to recover this amount of visible gold. Granada Gold has appointed Tetra Tech to begin a gap analysis to amend the current Certificate of Authorisation for an on-site mill at Granada Mine.
