Blue Sky's CEO on vanadium, plus having 'one of the largest districts of potential uranium' in the world

written by InvestorNews | March 8, 2019 "We just put out our PEA (for the Ivana Uranium-Vanadium deposit at Amarillo Grande Project). Our PEA indicates, if it was in production today it would be one of the lowest cost uranium production in the world and with a strike length of over 145 kilometers. This entire district that we control has the potential to be one of the largest uranium districts in the planet, very significant discovery." States Nikolaos Cacos, President, CEO and Director of <u>Blue Sky Uranium</u> <u>Corp.</u> (TSXV: BSK | OTCQB: BKUCF), in an interview with InvestorIntel Corp. CEO Tracy Weslosky.

Tracy Weslosky: We are both at PDAC 2019. I am an ardent fan of the uranium sector in general. Can you tell us what your most competitive advantage for all of you investors out there looking at uranium presently is?

Nikolaos Cacos: We just put out our PEA (for the Ivana Uranium-Vanadium deposit at Amarillo Grande Project). Our PEA indicates, if it was in production today it would be one of the lowest cost uranium production in the world and with a strike length of over 145 kilometers. This entire district that we control has the potential to be one of the largest uranium districts in the planet, very significant discovery.

Tracy Weslosky: One of the largest districts of potential uranium on the planet. Is that correct?

Nikolaos Cacos: That is correct, yes.

Tracy Weslosky: Okay. We have a global shortage of uranium, yes?

Nikolaos Cacos: We have a shortage of uranium. I think more and more around the world, especially emerging markets, economies are looking at uranium and nuclear power because it is green, it is efficient and it is safe. As that demand continues to grow the shortage is going to be more and more exacerbated and the price of uranium is going to start moving up, as we have seen in the last year a 50% appreciation in the uranium.

Tracy Weslosky: If a new investor was coming and they were looking at Blue Sky Uranium, what would you want to leave them with? I know you are obviously in Argentina, which would be a competitive advantage. Can you talk to us about your competitive advantages for new investors looking at Blue Sky?

Nikolaos Cacos: If you are an investor, a new investor, you are looking to make money. The best way to make money is before something really begins to takeoff. You look at the fundamentals, you look at the management team and you look at what assets that we have got. We have got all three…to access the complete interview, <u>click here</u>
