

Two power tools for investors – trending stats and the ii6

“The Trending section is one of our favorite parts of InvestorIntel.com, as it is an incredible information tool for investors wanting to know what most investors are really interested in. (This week: eSports, Gold, Uranium/Sustainability). It usually gives us an indicator of what is hot in the market and what is rising. This week we have a lot of people looking at uranium...They are looking at all critical materials. Uranium is leading the chart. Petition 232, the US-China trade war is definitely drawing a lot of investor’s interest in sustainability, looking at uranium for that very reason.” States Tracy Weslosky, CEO for InvestorIntel Corp., in an interview with InvestorIntel’s Peter Clausi.

Tracy went on to introduce InvestorIntel’s ii6 Summit Series. She said that the ii6 Series will give a company which has the right management team, the right story and is achieving benchmarks in a timely manner, face-to-face time with real investors. 1st ii6 Summit will be taking place at the King Edward on Thursday, August 8th from 930-11AM (registration at 9AM).
