

# Signature Resources' Leliever on securing gold drilling results that 'were better than we anticipated'

written by InvestorNews | March 14, 2019

Recently during [PDAC 2019](#), John 'Johnny' Leliever, Prospector and Founder of [Signature Resources Ltd.](#) (TSXV: SGU | OTCQB: SGGTF), shared Signature Resources' competitive advantages with InvestorIntel's Tracy Weslosky.

Tracy started by asking about recent drilling results. Johnny replied with: "We were not only pleased, we actually had results that were better than we anticipated and that has driven us to this next program that we are going to start within weeks...we are going to drill another 1500-2000 meters and we are going to target some really high grade areas that have been under drilled..."

Signature Resources Ltd. is a Canadian gold exploration company with advanced and early exploration assets. Its core asset is the Lingman Mine Project encompassing the Lingman Lake Gold Mine with an historic estimate of 234,648 oz of gold, and two new early exploration projects: Lingside West and Lingside East. All three projects are located in the Lingman Lake greenstone belt of northwestern Ontario. Signature is poised to advance and expand these projects centering on targeted diamond drilling of the high-grade gold zones at the Lingman Lake mine.

# Leliever on a Signature high-grade gold theme for the holidays.

written by InvestorNews | March 14, 2019

“We just finished a 1,500 meter drill program. We tested the West Zone, South Zone, Central Zone and the North Zone. To our not so much of a surprise, but at least to the positive side, not only were the results fantastic, but indications are they are better than what the historic results had indicated. We are excited.” states John Leliever, Prospector and Founder of [Signature Resources Ltd.](#) (TSXV: SGU | OTCQB: SGGTF), in an interview with InvestorIntel Corp. CEO Tracy Weslosky.

**Tracy Weslosky:** John this is a multigenerational property that you have in Signature. Is this correct?

**John Leliever:** Yes it is.

**Tracy Weslosky:** For those of you out there in InvestorIntel watching Signature Resources, your last three news releases all say high-grade gold. Is that correct?

**John Leliever:** They sure do.

**Tracy Weslosky:** Let us start with your most recent drilling results from the Lingman Project please.

**John Leliever:** That is a great place to start because it is

really exciting for us, Signature. This property has relied on historical information to get it to where it is today. Being the new guys on this project for a little while now everybody was looking to us to produce our own results. We just finished a 1,500 meter drill program. We tested the West Zone, South Zone, Central Zone and the North Zone. To our not so much of a surprise, but at least to the positive side, not only were the results fantastic, but indications are they are better than what the historic results had indicated. We are excited.

**Tracy Weslosky:** Speaking of excited, for those of you out there from the cannabis market looking to redirect your capital into a resource company, as a junior you have a substantial amount of claims and I read nearly 10,000 hectares. Is that correct?

**John Leliever:** Actually we are sitting over 22,000 hectares. It is a very, very large land package covering for the most part the whole greenstone belt that encompasses the Lingman Lake area.

**Tracy Weslosky:** Would you mind dumbing that down for some of us at InvestorIntel who may not have a multigenerational resource background like you do John?

**John Leliever:** In simpleton terms a greenstone belt is part of a geological formation that typically gold is found within. This particular belt is about 25-27 kilometers long. It trends east-west with a bit of a horizon curve to it as it is trending. We found that there were some mineral occurrences to the far west, about 22 kilometers away from the actual Lingman Lake Mine site. What we did is we chose to cover that, particularly with computer staking now. We covered that. Protected ourselves, protected the asset for our shareholders and future opportunities. It is exciting because an airborne geophysical program had been completed on the property and indications are

two major horizons trending across the whole greenstone belt with nothing but prioritized targets for us. There was not any b's identified or c's identified. This is a great upside potential for exploration for our company.

**Tracy Weslosky:** Speaking of the greenstone belt, you have two other projects in addition to the Lingman Project, is that correct?

**John Leliever:** The optics of it is there are three components to the project. We have our focus at the mine site where there are 234,000 historical ounces indicated in the ground from previous drilling. Our focus will be over the next 24 months to increase that ounce count by drilling. Just focused on drilling, drilling, drilling. Then we have the two other components to it, the east and the west of the mine site area...to access the complete interview, [click here](#)

## Signature Prospector on the rise of interest in gold

written by InvestorNews | March 14, 2019

March 28, 2018 – “Signature’s team has been in this business for a long time, specifically the gold sector. We have been involved in projects that have been world-class.” states John Leliever, Prospector and Founder of [Signature Resources Ltd.](#) (TSXV: SGU | OTCQB: SGGTF), in an interview with InvestorIntel’s

Jeff Wareham.

**Jeff Wareham:** John you are a third generation prospector. You have seen a lot. What do you think of the market right now?

**John Leliever:** Prospectors are a dying breed that is for sure. The market, in my lifespan, and I am sure in my family's lifespan, this is probably the toughest they have been that I can ever remember. The survivors are the ones that keep their nose to the grindstone and just plug away and do not give up.

**Jeff Wareham:** On that note you just put in your most recent press release says that the weather is terrible and in northern Ontario and it is tough to get a plane up to do your surveys. But, what good news can we look for from Signature over the next few months?

**John Leliever:** I am very optimistic that this is going to be Signature's year to actually break through all the negative that the industry has been experiencing. I think we are going to see an interest in our sector. In the gold sector I think we are going to see personally some interest in our company and the future that we have laid out. As far as the plans, we have not announced all our plans at this point in time, but I would say that within the next 6 months Signature should be very active and making news.

**Jeff Wareham:** You have got a great historic resource and an incredible property package. Is the plan to try and prove up those ounces or confirm that?

**John Leliever:** Absolutely. We have 234,000 historical ounces already indicated. Our goal initially is to double that, possibly even improve on doubling that over the next 6 to 12 months. We have a huge blue sky opportunity with the greenstone belt to the west and the opportunities that we believe will be

presented from the airborne survey results and exploring on that.

**Jeff Wareham:** We talked about the challenges in the market. There is a lot of junior mining companies struggling to find investors. Why should somebody choose Signature?

**John Leliever:** Signature's team has been in this business for a long time, specifically the gold sector. We have been involved in projects that have been world-class. Not necessarily at the management level, but involved with those projects. We understand world-class projects, that grassroots can evolve into a little bit more advanced stage and take it to a level where some senior mining companies would be interested in our project. I think that we have the talent to get it there and get it there in a shorter period of time than a true grassroots company...to access the complete interview, [click here](#)
